SHEETS

Dear partner,

at Alumil we are building excellence every day. Through our consistent research and development of products we are able to offer certified solutions to meet even the highest requirements of impressive projects around the world.

Alumil's range of Accessories includes products of unparalleled ergonomics and enhanced durability that offer great aesthetics. All solutions have been carefully chosen and developed as Alumil Systems' parts, providing our customers with an extensive range of architectural solutions.

We proudly present a complete guide of our Accessories range highlighting the superior certifications and technical features of Alumil hardware. Please contact your Alumil representative for further information or special requests that we would be pleased to advise upon and develop in order to meet your unique requirements.

ALUMIL 7mm PIN HANDLES

FUNCTION

Aluminium 7mm pin handles with Alumil Patented design and logo for opening, tilt-and-turn, sliding and curtain wall systems

TECHNICAL FEATURES

- Security Secustic® mechanism to prevent reverse (outside) rotation of the handle and offer anti-burglar protection
- Rotation from 0° to 180° with stop position at 90°
- 4 versions available:
 - **Standard:** for casement or sliding windows
 - **Full metal cover:** for casement or sliding windows
 - **Cranked:** for sliding or curtain wall windows
 - **Long:** for LNS mechanism of 90kg or for windows with many locking points (increased torque)
- Available also in pairs for in-out application (without Secustic) for sliding
- Flush handle available for the outside
- Pin fixed on handle

MATERIALS

- Full aluminium main body
- Polyamide base
- Base cover plastic (Standard / Long) or metal (Metal cover / Cranked)
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 mat
- Brown powder coating RAL 8707
- Silver / Titanium / Bronze anodization
- Special colors upon request

CERTIFICATION

- Certified according to EN 13126-3:2012-02
- Durability:
 - Grade 3/180 -> 10.000 cycles
 - 15.000 cycles - Independent test
- Corrosion resistance: Grade 5 -> 480 hours salt-spray test [EN 1670]
- 10 Year operational Guarantee
- Alumil 5 Year Guarantee

7mm PIN LOCKABLE HANDLES

FUNCTION

Lockable 7mm pin handles for opening, tilt/turn and sliding systems for enhanced security

TECHNICAL FEATURES

- According to EN 13126-3, the only way to reach RC2 anti-burglar performance is by using lockable handle
- Applicable to common use areas to control window use
- Push in lockable function to block the handle movement in closed position
- Keys are identical for all handles
- Standard handle with key:
 - Extra security Secuforte® mechanism to prevent reverse (outside) rotation of the handle, as the rotation is only performed when lightly pressed
 - Self-adjustable pin from 20 to 30mm length
 - Works with the Alumil tilt and turn mechanisms and multiple locking point sliding locks
- TBT4 handle:
 - Used for tilt before turn windows
 - Movement only to tilt and closing positions available without the use of the key to allow ventilation and locking of the window
 - Movement to opening position requires the use of the key to allow cleaning and maintenance
 - When moving from opening to tilting position without the key, the reverse action is not allowed

MATERIALS

- Aluminium main body
- Polyamide base and cover
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 matte
- Brown powder coating RAL 8707
- Silver / Titanium / Bronze anodization

CERTIFICATION

- Alumil 5 Year Guarantee
- 10 Year operational Guarantee
- Certified according to EN 13126-3:2012-02
- Window handle with key Secuforte:
 - Durability: Grade 3/180 -> 10.000 Tilt & Turn Cycles
 - Corrosion resistance: Grade 3 -> 96 hours salt-spray test
 - Security: Grade 3/3 -> 200 Nm resistance against twisting-off and forcing-off / Key-operated locking mechanism with minimum 100 locking variations
- Window handle TBT:
 - Durability: Grade 3/180 -> 10.000 Tilt & Turn Cycles

ALUMIL 7mm PIN SLIM HANDLES

FUNCTION

Narrow rosette handles for open out, sliding and curtain wall systems with Alumil Patented design and logo

TECHNICAL FEATURES

- 7mm pin
- Alumil patented handle design
- Available in right and left-handed versions
- Operated only between 0-90°
- Pin length 63mm for use at outward openings (SMARTIA S67 & SUPREME S77)
- Available version with key (not branded) for RC2 performance

MATERIALS

- Full aluminum main body
- Polyamide base
- Base cover plastic
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 matte
- Brown powder coating RAL 8707
- Silver / Titanium / Bronze anodization

CERTIFICATION

- Alumil 5 Year Guarantee
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- 10 Year operational Guarantee

ALUMIL 7mm PIN BI-FOLDING DOOR HANDLES

FUNCTION

Special handles for bi-folding doors with Alumil Patented design and logo

TECHNICAL FEATURES

- 2 models for Alumil systems SMARTIA MF65 & SUPREME SF85
- Alumil patented handle design on both models
- Allow 360° rotation with stop at 90°
- 7mm pin
- Alumil bi-folding door handle SF85 designed for minimum overall rosette height, just 15mm

MATERIALS

- Full aluminum main body
- Aluminum base
- Aluminum cover
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 matte
- Silver / Titanium anodization
- Natural / Black anodized SF85 bi-folding door handle

ROSETTES FOR REMOVABLE PIN HANDLE

FUNCTION

Aluminum rosettes for public places that ensure the non-operation of the windows by unwanted users

TECHNICAL FEATURES

- Rosette details:
 - Sliding partial cover cap
 - Base supporting lugs
 - Concealed fixing with M5 thread screws
 - Suitable for covering the window gear
- Detachable handle with 7mm pin with length 45mm

Rosette

Detachable handle

MATERIALS

- Full aluminum main body of handle and rosette
- Galvanized pin
- Nylon base rosette

ALUMIL 7mm FLUSH PIN HANDLES

FUNCTION

Flush pin handles with 7mm pin that offer full opening at first sash in sliding systems

TECHNICAL FEATURES

- Combined with multi point sliding locks because of the 7mm pin
- Offers flush installation with the sash
- Performs 90° pin rotation by the use of the button
- Pin length equal to 20mm
- Equipped with closing indicator (red lock icon)
- Different article for right or left rotation

MATERIALS

- Zamak main body
- Glass reinforced (30%) polyamide handle and base
- A2 stainless steel screw

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005
- Silver powder coating RAL 9006

CERTIFICATION

- Certified according to EN 13126-3
- Durability: Grade 3/180 -> 25.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- Alumil 5 Year Guarantee

ALUMIL 8mm PIN STANDARD DOOR HANDLE

NEW!
UPDATE

FUNCTION

Standard door handle with Alumil Patented design and logo as an elegant and cost-effective solution

TECHNICAL FEATURES

- Alumil logo
- Set includes 2 handles, pin, 2 rosettes with fixed bases and fixing screws
- Spring action handles with screws behind the rotating base plate
- Special design with a 6o slope on the neck of the handle to avoid contact between the handle and the frame when used in pairs (inside/outside)

Packaging

ALUMIL 8mm PIN DOOR HANDLES

FUNCTION

Aluminium door handles with Alumil Patented design and logo

TECHNICAL FEATURES

- 5 versions available
 - Paired handle with cylinder rosette (oval)
 - Paired handle with interior door rosette (round)
 - Paired or single handle with full body rosette
 - Paired handle with full body rosette and fixed outside knob
 - Single cranked handle
- Handles without full body rosette come with separate spring and have Quick-Fit® pin system
- Handles with full body rosette have pins attached on body
- Cranked handle allows easy operation with increased handling space for outside opening doors
- For in-out handle installation for the oval rosette handle the sash width is from 60 to 100mm. The total pin length is 158mm
- Cranked handle comes without pin, therefore any 8mm spindle can be installed in any length (85 to 190mm)

MATERIALS

- Full aluminium main body
- Polyamide base
- Aluminium base cover
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 mat
- Brown powder coating RAL 8707
- Silver / Titanium / Bronze anodized
- Special colors upon request

CERTIFICATION

- Certified according to EN 1906:2012
- Durability:
 - Handle set with full plate:
 - Grade 6 -> 100.000 cycles
 - 182.500 cycles - Independent test for residential use
 - Handle set with separate rosette:
 - Grade 7 -> 200.000 cycles
 - 255.500 cycles - Test for non-residential use
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test
- 10 Year operational Guarantee
- ISO 9001 / ISO 14001
- Alumil 5 Year Guarantee

ALUMIL 8mm PIN ANTIMICROBIAL SUPREME DOOR HANDLES

FUNCTION

Door handles for Alumil Supreme Systems with Alumil logo covered by antimicrobial protection

Preview

TECHNICAL FEATURES

- Standard 8mm pin
- Polyester powder designed for the external environment offering excellent resistance to light and weather conditions
- Powder also contains silver ions, which provide complete and effective life-lasting antimicrobial protection when present in top coating of metallic products
- Antimicrobial protection is the ability of a material to eliminate or inactivate microbes such as bacteria, fungi, (including mould) and virus
- A design that offers great quality, modern aesthetics
- Different article for right or left rotation
- Production of handle and rosette hot die casting procedure
- Rotation angle of 40°
- Available rosette spacer pair for SUPREME SD115 glass version (1 pair per handle for both rosettes)

Antimicrobial protection

MATERIALS

- Full zamak main body, base and rosette

SURFACE COATING

- Mat Nickel
- Black mat
- Final coating of antimicrobial powder

CERTIFICATION

- Certified according to EN 1906:2012
- Durability: Grade 6 -> 100.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- ISO 22196: 2011 [Antibacterial activity]
- ISO 9001:2008
- Alumil 5 Year Guarantee

ALUMIL CREMONES

NEW!
UPDATE

FUNCTION

Cremones for casement and tilt/turn windows with Alumil patented design and logo

TECHNICAL FEATURES

- Two fork version for casement windows
- One fork version for tilt/turn windows using the Alumil TnT euro groove mechanism
- Applicable to all Alumil 15/20 euro groove hinged systems

Casement cremone

Euro groove TnT cremone

MATERIALS

- Main body, lever, internal mechanism and forks made of die casted zamak [EN 1774]
- Inox counter plate

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005 matte
- Silver powder coating (anodic ice)
- Available in special colors

CERTIFICATION

- Certified according to EN 13126-3:2011
- Durability: Grade 3/90 -> 10.000 cycles for casement
Grade 3/180 -> 10.000 cycles for TnT
- Corrosion: Grade 4 -> 240 hours salt-spray [EN 1670]
- Alumil 5 Year Guarantee

ALUMIL LOCKABLE CREMONES

FUNCTION

Cremones with key for casement and tilt/turn windows with Alumil logo

TECHNICAL FEATURES

- Two fork version for casement windows
- One fork version for tilt/turn windows using the Alumil t/t euro groove mechanism
- Applicable to all Alumil 15/20 euro groove hinged systems
- Engraved Alumil logo on the body

MATERIALS

- Main body, lever, internal mechanism and forks made of die casted zamak (EN 1774)
- Inox counter plate
- Inox TCEI 5MAx10mm allen screws

SURFACE COATING

- White powder coating RAL 9016
- Black matte powder coating RAL 9005 mat
- Silver powder coating (anodic ice)

CERTIFICATION

- Certified according to EN 13126-3:2011
- Durability: Grade 5 -> 25.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- Alumil 5 Year Guarantee

ALUMIL CREMONES FOR OUTWARD OPENING & SHUTTER SYSTEMS

FUNCTION

Cremones for casement outward opening windows and shutters with Alumil logo

TECHNICAL FEATURES

- Two fork cremone with two-way movement
- Mechanical grip with metric screws on profile for long lasting and sturdy fixing
- Curved design for opening away from frame profile
- Adjustable forks allow for the same item to be used on various profiles with excellent fitting
- Sturdy full metal body allows multiple locking points to be operated with ease
- Applicable to Alumil SMARTIA M15000, M9660, M11000, M940, M9400, S67 and SUPREME S77

Application on profile

MATERIALS

- Die cast aluminum handle
- Zamak case, cover case, rotor, racks and sliders
- Delrin guide and bush
- Stainless steel screws

SURFACE COATING

- White powder coating RAL 9010
- Black powder coating RAL 9005 mat
- Silver powder coated Anodic Ice

CERTIFICATION

- Certified according to EN 13126-1 & 13126-4
- Durability: Grade 5 -> 25.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test
- Alumil 5 Year Guarantee

ALUMIL 10mm PIN LIFT/SLIDE OVAL HANDLES

FUNCTION

Aluminium handles for lift/slide systems with Alumil
 Patented design and logo

TECHNICAL FEATURES

- 180° rotation on the handle
- Full metal cover rosette
- Pin 10mm detachable
- Available single handle for internal installation
- Available also in pairs for in-out application with cylinder hole
- Flush handle available for the outside in 7 or 11mm depth
- Rosette in single handle is detachable
- Available handle with smaller neck for corner typologies
- Available rosette covers for internal or external handles to transform a rosette with cylinder hole to rosette without hole and reverse (not for corner handles)
- Rivet nut available for handle stabilization in case of no flush handle used

MATERIALS

- Full aluminium main body
- Zamak base
- Aluminium base cover
- Galvanized pin

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9712 mat
- Brown powder coating RAL 8707
- Silver / Titanium / Bronze anodized
- Special colors upon request

CERTIFICATION

- Certified according to EN 13126-16
- Durability: 20.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- 10 Year operational Guarantee
- Alumil 5 Year Guarantee

STAINLESS STEEL FIXED DOOR HANDLES ALUMIL

FUNCTION

Stainless steel fixed handles for entrance doors with Alumil logo

TECHNICAL FEATURES

- 3 different designs of modern aesthetics
 - Flat 40x10mm
 - Tubular Ø30
 - Tubular Ø30 with 55° legs
- 5 different lengths from 400 to 1800mm
- Available in single or pair versions with stabilizing rosette for single handles or installation kit for pair ones
- Also available standard handles of length 26cm
 - “Minimal” handle
 - “Classic” handle

MATERIALS

- AISI 304 stainless steel main body
- Stainless steel screws included in the package
- Stainless steel stabilizing rosettes included in the package

SURFACE COATING

- Stainless steel finishing at all handles
- Mat chrome for Classic handle

BALCONY FINGER PULL HANDLE

FUNCTION

Exterior finger pull handle combined with the door catch provides an elegant solution for holding the sash in closed position if pulled from the outside

TECHNICAL FEATURES

- Elegant pull handle design
- Sturdy fixing ensures extended lifetime even for larger doors
- Pull handle fixing screws are not visible
- Available drilling jig for ease of installation
- Door catch available in euro groove and PVC groove versions

Pull handle preview

Pull handle drawings

MATERIALS

- Extruded aluminum pull handle
- Stainless steel screws
- Zamak and steel door catch

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005 mat
- Silver anodized F1 mat
- Special colors upon request

ALUMIL "STANDARD" EURO GROOVE T/T MECHANISM 130KG

FUNCTION

Alumil branded Euro-groove hardware for all Alumil 15/20 sash euro groove profile systems

TECHNICAL FEATURES

- Tilt/turn hardware system available in two versions: compatible with both the Alumil cremone and the Alumil 7mm spindle handle
- Mishandling device for both handle versions
- All hardware components are suitable for left and right-handed windows
- Convenient 3D hardware adjustment
- General gasket pressure adjustment on all eccentric locking cams using a 4mm Allen key to achieve optimized pressure and tightness of the sash
- All hinge parts completely clampable, enabling efficient installation with no drilling necessary
- The connecting-rod Ø6mm coupling-system simplifies hardware installation
- The connecting-rod geometry is perfectly adapted to the 15/20 sash groove
- Identical hardware aesthetics of top stay hinge and bottom pivot rest - all flush with the sash overlap
- Also available in TBT version (Tilt at 90° and turn at 180°)
- Four different hardware locking options for the passive sash
- Sash width from 355 to 1700mm
- Sash height from 500 to 2800mm
- For sash widths exceeding 1400mm an additional stay arm is required
- Hardware load-bearing capacity tested up to 130kg sash weight
- Alumil branded

MATERIALS

- Hardware components from high-quality steel, Zamac die-casting and aluminium alloys
- Aluminium components are anodized or powder-coated
- The steel components consist of stainless alloys

SURFACE COATING

- White powder coated hinges RAL 9016
- Black powder coated hinges RAL 9005
- Anodised silver hinges in F1/EV1 surface-finish
- Mill finish (non-treated) hinges for project-related coating
- Zamac die-casting components are subjected to bichromating surface treatment and an additional silver-coloured coating

CERTIFICATION

- Alumil extended 10 Year Guarantee (standard 5 years)
- Certified according to EN 13126-8:2006
- Durability: Grade H2 -> 10.000 cycles (equivalent to 40,000 individual turn, tilt and lock operations)
- Corrosion resistance:
 - Hardware set: Grade 4 -> 240 hours salt-spray test
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1.000 hours salt-spray test [EN 1670, EN 9227 based on EN 13126-1:2011]
- In accordance with REACH regulation (1907/2006/EG) regarding SVHC substances
- Tested in accordance with the requirements of the RAL-GZ 607/3:2009 Regulation by the German RAL institute
- DIN EN ISO 9001:2008

ALUMIL "ADVANCED" EURO GROOVE T/T MECHANISM 150KG

FUNCTION

Alumil branded Euro-groove hardware for all Alumil 15/20 sash euro groove profile systems

TECHNICAL FEATURES

- Tilt/turn hardware system available in two versions: compatible with both the Alumil Euro Groove Tilt&Turn Cremone and the Alumil 7mm spindle handle
- Performing, due to innovative materials and technical solutions with an ease of adjustment in the three dimensions and fast assembly
- Mishandling device for both handle versions
- All hardware components are suitable for left and right-handed window.
- Convenient 3D hardware adjustment
- General gasket pressure adjustment on all eccentric locking cams using a 3mm Allen key to achieve optimized pressure and tightness of the sash
- All hinge parts completely clampable, enabling efficient installation with no drilling necessary
- The connecting-rod $\varnothing 6\text{mm}$ coupling-system simplifies hardware installation
- The connecting-rod geometry is perfectly adapted to the 15/20 sash groove
- Latch available for the second sash
- Tilt/Turn hardware system:
 - Sash width from 400 to 1700mm
 - Sash height from 500 to 3000mm
- For sash widths exceeding 1600mm an additional stay arm is required
- Hardware load-bearing capacity tested up to 150kg sash weight

MATERIALS

- Hardware components from high-quality steel, galvanized Zamak die-casting and aluminum alloys
- Aluminium components are powder-coated
- The steel components consist of stainless alloys

SURFACE COATING

- Black powder coating RAL 9005
- Silver powder coating Anodic ice
- White powder coating RAL 9016

CERTIFICATION

- Certified by the German RAL Institute according to :
 - RAL GZ 607/3:2017
 - EN 13126-8: 2017
- Durability: Grade H2 -> 10.000 cycles (equivalent to 40,000 individual turn, tilt and lock operations)
- Corrosion resistance: Grade 5 -> 480 hours salt-spray test [EN 1670]
- Certified by SKG Dutch institute for its anti-burglary resistance
- Passed the test "load-bearing capacity of safety devices" [RAL GZ 607/3:2017]
- Alumil 5 Year Guarantee

ALUMIL “STANDARD” CONCEALED EURO GROOVE T/T MECHANISM 150KG

FUNCTION

Alumil branded Euro-groove hardware for all Alumil 15/20 sash euro groove profile systems

TECHNICAL FEATURES

- Tilt/turn hardware system available in two versions: compatible with both the Alumil Cremone and the Secustic Alumil spindle handle.
- Tilt/turn hardware
 - Sash width from 530 to 1600mm
 - Sash height from 500 to 2800mm
- Mishandling device for both handle versions
- All hardware components are suitable for left and right-handed windows
- Convenient 3D hardware adjustment
- General gasket pressure adjustment on all eccentric locking cams using a 4mm Allen key to achieve optimized pressure and tightness of the sash
- Simple and intuitive assembly, with no drilling or template required
- The connecting-rod Ø6mm coupling-system simplifies hardware installation
- The connecting-rod geometry is perfectly adapted to the 15/20 sash groove
- Minimal aesthetics due to concealed hinges
- Four different hardware locking options for the passive sash
- Hardware load-bearing capacity tested up to 150kg sash weight
- Extra locking points according to sash dimensions
- Alumil branded

MATERIALS

- Hardware components from high-quality steel, Zamak die-casting and aluminium alloys
- The steel components consist of stainless alloys

SURFACE COATING

- No additional surface treatment

CERTIFICATION

- Alumil 5 Year Guarantee
- Certified according to EN 13126-8:2018-01
- Durability: Grade H2 -> 10.000 cycles (equivalent to 40,000 individual turn, tilt and lock operations)
- Corrosion resistance:
 - Hardware set: Grade 4 -> 240 hours salt-spray test
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1.000 hours salt-spray test [EN 1670, EN 9227 based on EN 13126-1:2011]
- In accordance with REACH regulation (1907/2006/EG) regarding SVHC substances
- DIN EN ISO 9001:2008

ALUMIL“ADVANCED” CONCEALED EURO GROOVE T/T MECHANISM 180KG

FUNCTION

Concealed tilt/turn mechanism for all Alumil euro groove systems suitable for tilt/turn, side-hung and bottom hung openings (skylights)

TECHNICAL FEATURES

- Available for bottom hung, side-hung and tilt/turn single and double windows
- Tilt/turn hardware system
 - Sash width from 422 to 1700mm
 - Sash height from 600 to 2600mm
- 180° window opening
- 180kg window capacity
- Simple and intuitive assembly, with no drilling or template required
- Patented 3D adjusting system
- Special hinge design for strong clamping in closed position and resistance to windload
- Easy one-man sash hanging
- Special hinges for bottom hung up to 160kg
- Combined with Alumil 7mm pin handle
- Standard 1 sash kit with WOSD on corner and top and bottom locking points
- Standard 2 sash kit with bottom shoot bolt
- Extra shoot bolt for top locking if required
- Extra locking points according to sash dimensions

MATERIALS

- Arm levers in stainless steel AISI 304
- Hinge levers in special galvanized steel

SURFACE COATING

- No additional surface treatment

CERTIFICATION

- Certified according to EN 13126-8:2006
- Durability: Grade 4 -> 15.000 cycles (equivalent to 60,000 individual turn, tilt and lock operations)
- Corrosion resistance: Hardware set: Grade 4 -> 240 hours salt-spray test
- Tested in accordance with the requirements of the RAL-GZ 607/3:2009 Regulation by the German RAL institute
- Passed the test "load-bearing capacity of safety devices" [EN 14351-1:2006-07]
- DIN EN 1191:2013-04
- Alumil 5 Year Guarantee

PVC GROOVE T/T MECHANISM

NEW!
UPDATE

FUNCTION

PVC groove hardware system for all Alumil 16mm sash groove profile systems

TECHNICAL FEATURES

- Tilt/turn hardware system available in three versions according to hinge type:
 - **Drilled (D type)** - Surface mounted hardware with sash opening angle up to 180°
 - **Clamped (C type)** - Hardware components clamped to the frame without the need of drilling the profile
 - **Concealed - Clamped (C-C type)** - invisible hardware components clamped to the frame with sash opening angle up to 100°
- Available in two versions according to locking cam type, both with gasket pressure (± 1 mm) eccentric adjustment:
 - Security mushroom cam
 - Roller Cam
- Compatible with Alumil 7mm pin handle
- All hardware components are suitable for left and right-handed windows
- Convenient 3D hardware adjustment
- 2 different hardware locking options for the passive sash
- WOSD on the handle side gear
- 7.5 and 15mm backset of gear
- Gears available both for standard and variable handle height
- Fast and easy fabrication for mass production
- Very high security levels (up to RC3) depending on the system

MATERIALS

- Hardware components from high-quality steel, Zamac die-casting and aluminium alloys
- Aluminium components are anodized or powder-coated
- The steel components consist of stainless alloys

SURFACE COATING

- White / Black powder coated / Silver anodized finish for C type
- Cover caps available in a large selection of colors for D type
- Zamak die-casting components are subjected to bichromating surface treatment and an additional silver-coloured coating

CERTIFICATION

- Alumil extended 10 Year Guarantee (standard 5 years)
- Certified according to EN 13126-8:2006
- Durability: Grade 4 -> 15.000 cycles (equivalent to 60,000 individual turn, tilt and lock operations) on a 130kg sash
- Corrosion resistance:
 - Hardware set: Grade 4 -> 240 hours salt-spray test
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1.000 hours salt-spray test [EN 1670, EN 9227 based on EN 13126-1:2011]
- Tested in accordance with the requirements of the RAL-GZ 607/3:2009 Regulation by the German RAL institute
- In accordance with REACH regulation (1907/2006/EG) regarding SVHC substances
- DIN EN ISO 9001:2008

ALUMIL LIFT/SLIDE MECHANISM

NEW!
UPDATE

FUNCTION

Alumil branded lift/slide hardware for all Alumil lift/slide systems providing smooth and quiet movement of sliding sashes and enhanced security.

TECHNICAL FEATURES

- Available in two versions based on locking type:
 - Alumil Pin on the Gear with flat striker on the frame**
 - Three oval shaped locking points
 - Gear available in two lengths for sash heights 1865-2765mm
 - Extensions of 500mm are available without locking point for aesthetics
 - Standard locking with the locking plate on the frame**
 - Two locking points with a third also available and concealed on the gear if required
 - Gear available in four lengths for sash heights 865-2765mm
 - Extensions of 500mm are available without locking point for aesthetics and with locking point for enhanced security
- Available in two basic versions based on sash weight:
 - Standard version: sashes up to 200kg
 - Heavy duty version: sashes up to 300kg (up to 600kg with additional rollers and lift-unit)
- Gear backset is 27.5mm
- Gears can accommodate profile cylinders for enhanced security
- Combined with Alumil 10mm pin handle
- Special locking plate for ventilation
- Tension spring available for smoother lifting of heavy sashes (>200kg). Retrofitting is possible
- Handle dampener available for smoother and safer lowering of the sash. Prevents high speed strike back of the handle. Recommended for sashes >100kg. Mainly used as a child safety device. Retrofitting is possible
- Sash width from 700 to 3.300mm
- A third light-weight version is also available for sashes up to 90kg. Two locking points only, with no gear extension and profile cylinder option available and for widths up to 1.900mm. Combined with Alumil 7mm pin long handle

Standard Gear + Locking plate for **OR** Alumil Pin Gear + Locking plate for Alumil Pin Gear

Standard version rollers (<200kg)

Heavy duty version rollers (<300kg)

Additional heavy duty version rollers (<600kg)

Tension spring Handle dampener

Soft close

Lift unit

MATERIALS

- Hardware components manufactured from high-quality steel, Zamac die-casting and aluminium alloys
- The steel components consist of stainless alloys

SURFACE COATING

- Zamac die-casting components, as locking components and runners, are subjected to bichromating surface-treatment and additional silver-colored coating
- Aluminium parts are silver anodized

CERTIFICATION

- Certified according to EN 13126-16:2008-04
- Durability: Grade 5 -> 25.000 cycles
- Corrosion resistance:
 - Hardware set: Grade 5 -> 480 hours salt-spray test
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1.000 hours salt-spray test [EN 1670]
- DIN EN ISO 9001:2008
- In accordance with the REACH regulation (1907/2006/EG) regarding SVHC substances
- Alumil 5 Year Guarantee

CODES & DESCRIPTIONS

Part numbers, descriptions and application ranges are depicted in the corresponding hardware catalogue and installation drawings.

ALUMIL GEARBOX SOLUTIONS

NEW!
UPDATE

FUNCTION

Gear transmission solutions for curtain walls, open out windows and doors with multi point locking systems

TECHNICAL FEATURES

- Standard gearbox:
 - Comes in different backsets
 - Available in 90° operation for doors and 180° operation for t/t windows
 - 18mm single direction throw for t/t window gearbox
 - Fixed with allen screws on the eurogroove
- Curtain wall gearbox:
 - Fixed with no machining on the eurogroove
 - Bi-directional 18mm throw
 - Operated by 7mm pin handle (Alumil Slim)
- Adjustable gearbox:
 - Backset from 23mm to 34mm
 - Bi-directional 18mm throw requires connector pin purchased separately
 - Fixing with the handle requires additional part purchased separately
 - Operated by 7mm pin handle (Alumil Slim) for open out windows)

OPENING LIMITERS

NEW!
UPDATE

FUNCTION

Hardware that limits the opening angle of hinged systems to avoid collision on nearby fixed objects. Also used as child safety device

TECHNICAL FEATURES

- Perfect fit at all opening Alumil systems
- Fits all standard Euro groove and PVC sash groove systems
- Available for bottom hung, top hung and side hung windows
 - Limiter with open out hold for bottom hung Euro or PVC groove
 - Limiter for side hung PVC groove
 - Limiter with adjustable brake for side hung or TnT. Installation always on the bottom side near the hinge
 - Limiter with telescopic 5 positions for top hung
 - Limiter with open hold and releasable arm function with handle use
- Adjustable opening angle depending on arm placement in five positions for top hung

MATERIALS

- Extruded aluminium or stainless steel rods
- Zamak fixing parts
- Polyamide sliders / brakes
- Stainless steel fixings
- ***Materials differ between codes

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Limitation arm with brake certified according to EN 13126-8
 - Corrosion resistance: Grade 5 -> 480 hours salt-spray test [EN 1670]
 - Durability: Grade 4 -> 15.000 test cycles
- Alumil 5 Year Guarantee

EURO GROOVE STAY ARMS

NEW!
UPDATE

FUNCTION

Friction stay arms for all top-hung Alumil systems with euro groove profiles.

TECHNICAL FEATURES

- Available versions for heavy and light duty:
- Heavy duty:
 - Asymmetrical upper part for enhanced return and closing of the sash
 - Specially shaped to be self-locating in the sash-side 15/20 euro groove for easy mounting
 - Secures to the sash with a pre-installed grub screw
 - The arm mounts to the frame (with 14/18 groove) with self-tapping screws (not included)
 - Polyamide filling shim as spacer for solid and durable mounting to the frame
 - For sashes with height up to 2000mm, width up to 1700mm and weight up to 100kg
 - 10" and 16" stay arms are also applicable to side hung outward opening window
- Light Duty:
 - For sash height up to 1000mm and weight up to 55kg
 - 21mm stack height of friction stay offers groove to groove direct concealed fixing without the use of additional packing
 - Friction stay arms made from austenitic stainless steel AISI 304 grade with friction slider made from polyamide

SIMPLE LOCKING SOLUTION FOR OPENING SYSTEMS

FUNCTION

Simple locking solutions for opening systems with easy fabrication at great value

TECHNICAL FEATURES

- To be used for inward opening windows and tilt windows
- Three alternative locking solutions

Finger catch:

- may be installed post-production on site
- automatically closes with pushing
- adjustable closing force
- fits all standard Euro groove and PVC groove systems

Cremone kit:

- to be used with the Alumil cremone
- 2 standard locking points top and bottom
- fits all standard euro groove systems

Handle lock:

- easy operation and low maintenance
 - fits all standard Euro groove and PVC groove systems
- All solutions are complete kits

MATERIALS

- Zamak / Aluminium / Polyamide main body
- Polyamide bushings
- Galvanized screws and fixing plates
- Stainless steel fixings and spring for euro groove finger catch

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005
- Silver powder coating
- Silver anodized
- Black polyamide parts

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL SIMPLE LOCKING SOLUTION FOR SLIDING SYSTEMS

NEW!
UPDATE

FUNCTION

Simple solution for sliding systems with single point locking and flush handle with Alumil logo

TECHNICAL FEATURES

- One-point locking with hook
- Automatic function available with the use of a spring for ease of use (not in keyed version)
- Keyed version available (2 keys included)
- Clipped for easy installation without the use of screws
- Full metal flush handle for enhanced security
- Applicable to all non-thermally broken sliding systems and shutters

MATERIALS

- Main body of extruded aluminum (alloy 6060 T5)
- Sliding lock mechanism of die casted Zamak (alloy EN 1774)
- Flush handle insert of galvanized Zamak
- Plastic parts of Nylon 6/6
- Inox hook and striking plate (AISI 430)
- Inox self tapping screws

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005 matte
- Silver powder coating (anodic ice)

CERTIFICATION

- Certified according to EN 13126-3 : 2011
- Durability: Grade 4 -> 15.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours [EN 1670]
- Alumil 5 Year Guarantee

MULTI POINT LOCK FOR SLIDING SYSTEMS

NEW!
UPDATE

FUNCTION

Lock for Alumil sliding systems with multiple locking points and cylinder lock option for enhanced security

TECHNICAL FEATURES

- Perfect fit for all sliding Alumil systems
- From 1 to 4 locking points
- Two available gear backsets 7.5 and 15mm
- Selection of the handle's rotation degrees: 90° or 180°
- Large oval locking points with optional "antilift" accessory for enhanced security
- Combi version available with round pins
- Available version 90° with profile cylinder hole for enhanced security
- Available version 90° with profile cylinder hole in 1500mm for child safety
- Designed to work with the Alumil 7mm handle
- Integrated rubber bumper to ensure a smooth closing
- In locks 90°/180°
 - Potential of inserting an extra locking point via an 500mm extension
 - Anti-return function which prevents the unlocking of the gear through its locking pins
 - Available WOSD versions (wrong operation safety device)

NEW!
UPDATE

MATERIALS

- Steel main body and locking points
- Zamak parts

SURFACE COATING

- Zamak die-casting components are subjected to bichromating surface treatment and an additional silver-colored coating

CERTIFICATION

- Certified according to EN 13126-1/19
- Durability: Grade 5 -> 25.000 cycles
- Corrosion resistance:
 - Hardware set: Grade 3 -> 96 hours [EN 1670]
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1.000 hours salt-spray test [EN 1670, EN 9227 based on EN 13126-1:2011]
- Alumil 5 Year Guarantee

MULTI POINT LOCK INOX WITH HOOKS FOR SLIDING SYSTEMS

FUNCTION

Sliding lock with stainless steel faceplate and hooks for Alumil sliding systems with multiple locking points and cylinder lock option

TECHNICAL FEATURES

- Single-point, two-point or three-point lock configurations
- Hook bolt design draws the door closed against the seals
- Hook bolts ensure the highest security by not allowing sash to be lifted out of the guide rails
- Integrated mishandling device (WOSD) prevents crushing bolts on strikers
- Anti-pick security feature
- A version with cylinder hole is available for enhanced security
- Works with Alumil 7mm handles

MATERIALS

- Stainless steel faceplate
- Stainless steel hooks
- Die cast Zinc alloy mechanism with stainless springs

SURFACE COATING

- Brushed stainless steel

CERTIFICATION

- Tested according to EN 12400
- Durability: Grade 3 -> 20.000 cycles
- Corrosion resistance: Grade 4 -> 240 hours [EN 1670]
- Pull resistance 200daN/hook
- Alumil 5 Year Guarantee

PILE SEALS

FUNCTION

Brush pile seals for air, water and dust sealing for all sliding systems

TECHNICAL FEATURES

- Silent fin technology for smooth operation and easy sliding
- Excellent water and air sealing
- Fully boxed and easy to use roll packaging
- Available in regular brush, brush with membrane and triple fin brush editions to meet any given requirement
- High quality production with standardized sizes for easy insertion to profile
- Back width 6.9mm and 0.75mm thickness
- 4p brush width 2.9mm (2.60-3.20mm)
- Membrane at the same length with brush
- Base tolerance +0.1, -0.2mm

MATERIALS

- 100% polypropylene pile seals

SURFACE COATING

- White, grey and black color is part of raw material
- No additional surface coating is applied

CERTIFICATION

- Tri-fin Class A4 air-tightness: UNE-EN 12207:2000
- EU Standards and AAMA 701/702-04 Class A
- Water-proof and UV resistant
- ISO 9001 quality standards
- Alumil extended 10 Year Guarantee (standard 5 years)

ALUMIL ROLLERS

NEW!
UPDATE

FUNCTION

Aluminium and plastic rollers for all Alumil sliding systems

TECHNICAL FEATURES

- Perfect fit for Alumil sliding systems
- Single, double and quad wheel rollers
- Quick and easy installation with screw or fixing plate
- Designed to achieve maximum adjustment
- One-man adjustment with sash on frame
- Special composite wheel cover for smooth and silent operation
- In cases brush installed for guide rail cleaning
- Side to side self adjusting wheel
- Custom solutions can be offered, according to your needs, for higher sash weights
- All systems require 2 rollers per sash except S650 PHOS which requires 2 rollers for a sash weight under 250kg and 4 rollers from 250-1000kg

MATERIALS

- Extruded aluminium or polyamide main body
- Galvanized pins and screws
- Special polymer wheels

SURFACE COATING

- Not treated (standard aluminum or black polyamide)

CERTIFICATION

ALUMIL INOX GUIDE RAILS

FUNCTION

Alumil guide rails for efficient and smooth sliding of sashes

TECHNICAL FEATURES

- Specially designed to remain clean from dust, dirt, etc.
- Stainless steel and anodized aluminium ensure no rusting in a wide range of environmental conditions
- Heavy duty guide rails prevent dents under extreme load
- U-type guide rails can be produced in custom length upon project request
- **U-type 0,8mm** guide rail is used in:
 - simple sliding systems with plastic roller wheels and
 - lift & slide systems: Smartia M450 and S560
- **U-type 1,0mm** guide rail with PVC filling is used in Smartia M630
- **Heavy duty** guide rail is used in:
 - lift & slide system: Smartia S560 and Supreme S700
 - sliding systems with metal roller wheels: Smartia MF65, M630, Supreme SF85, S650, S650 Eclipse

Application of guide rail

MATERIALS

- Stainless steel AISI 304 as standard
- Stainless steel AISI 316 L for 1mm U-type guide rail
- Anodized extruded aluminum for S440 guide rail
- PVC filling in U-type 1,0mm guide rail

SURFACE COATING

- No coating can be applied on stainless guide rails
- Anodization on aluminum rails

CERTIFICATION

- Tested along with rollers for 25.000 cycles:
 - U-type 0,8mm: 360kg/sash for simple sliding systems
 - U-type 1,0mm: 150kg/sash for M630
 - Heavy duty U-type: 1000kg/sash for S650
 - Heavy duty V-type: 1000kg/sash for S650 Eclipse
- Raw material certifications upon request
- Alumil 5 Year Guarantee

STOPPERS FOR SLIDING SYSTEMS

FUNCTION

An excellent solution to prevent the handle of sliding sash hitting and damaging the surface of the second sash

TECHNICAL FEATURES

- Should be placed before the end of the second sash
- The polyurethane part allows better absorption
- Elegant design, great quality, modern aesthetics
- Door stopper fixing screws are not visible

ALUMIL STANDARD CURTAIN WALL STAY ARMS

FUNCTION

Curtain wall window stay arms for all Alumil systems with flat profiles with Alumil logo

TECHNICAL FEATURES

- Self balancing with four levers (65, 85kg versions) or six levers (100, 110, 120, 130kg versions) for smooth opening and closing
- Friction block with adjusting screw
- Anti rubbing composite slider to prevent vent drop
- From 0.6m to 2m height and up to 130kg vent
- Cam adjustment device should always be used
- Special endpoint for big gust loads
- Nylon snap-in shim to be used between the sash and the arms' fastening holes for easier and robust installation
- Nylon sash support and alignment wedge to properly load the stay arms when the window is closed
- Made in Europe

ALUMIL HEAVY DUTY PARALLEL PROJECTION CURTAIN WALL STAY ARMS

FUNCTION

A high-performance parallel opening hinge range for curtain wall and structurally glazed windows with Alumil logo

TECHNICAL FEATURES

- Provide ultimate natural ventilation by allowing a balanced air flow around the entire opening
- Maintaining aesthetically pleasing sightlines for modern facade design
- From 0.35m to 2.0m height, 0.25m to 2.0m width and up to 200kg vent
- Can be connected to a building management system as part of an automated solution for climate control
- Can be operated manually or using electric actuators
- Unique patented parallelism adjustment
- Patented synchronization method on larger hinge sizes
- Sash adjustment feature for use with heavier vents
- Hinge mechanism is fully concealed when the sash is closed
- Extra weight capacity and increased heights can be achieved using more than one stay arm per side
- Each cross on the side mounted arms offers 50kg capacity

MATERIALS

- Grade 1.4301 stainless steel links, track and inner slider [EN 10088-2]
- Grade 1.4567 stainless steel pivots [EN 10263-5]
- Zytel HTN FE8200 NC010 outer slider
- Nylon pivot washer
- Zinc alloy ZA5 pivot blocks
- Phosphor Bronze PB102 bush

SURFACE COATING

- Cold rolled finish stainless steel
- Plastic components are of uniform finish and color
- Die cast components are finished with copper nickel chrome plating

CERTIFICATION

- Durability: Tested to operate for 20,000 cycles
- Corrosion resistance: Grade 5 -> 480 hours [EN 1670]
- Capable of achieving the requirements for natural smoke and heat exhaust ventilators [EN 12101-2:2003]
- AAMA 901.1
- Up to 12 Year Guarantee

CURTAIN WALL LIMITERS

FUNCTION

Hardware that limits the opening angle of curtain wall, used for child safety

TECHNICAL FEATURES

- Perfect fit to Alumil curtain wall systems
- Available for top hung and side hung windows
- Limiters have composite brake for smooth operation
- Easy to fit, no routing required
- Suitable for 16mm to 18mm cavity heights
- Detachable restrictor
 - Can withstand a force in excess of 1000N when opened at the restricted position
 - Compatible with all Alumil heavy duty curtain wall stay arms
 - Blocks the window for safety and unlocks with a key to achieve full opening
 - Key is an extra code
- Stay open restrictor
 - Must be fitted in pairs
 - Large fitting position tolerance on frame and vent
 - Designed to prevent the window from closing when at open position
 - Stay open position automatically selected on opening of window
 - Restricted opening is defined when fitting stay open restrictors

Curtain wall detachable restrictor

Dedicated release key allowing the restrictor stay to be detached

Release key

Stay open restrictor

Release lever is reset when window is fully closed

MATERIALS

- Full austenitic stainless steel AISI 304
- Composite slider

SURFACE COATING

- Stainless steel / No additional surface coating

CERTIFICATION

- Corrosion resistance: Grade 5 -> 480 hours [EN 1670]
- UK BS 6375-2 for Load Bearing Safety Devices
- Extended 12 Year Guarantee
- SIS 212
- NYC DoH Certification for Detachable Restrictor

ALUMIL STANDARD HINGE SOLUTIONS

FUNCTION

Standard hinges for doors and windows, applicable on euro groove and PVC groove systems

TECHNICAL FEATURES

- Perfect fit for all opening Alumil systems
- CE hinges fit all standard 14/18 frame - 15/20 sash euro groove systems
- PVC hinge fits all standard 16mm PVC groove systems
- 3 types of hinges available
 - Standard: up to 55kg with 2pcs, 70kg with 3pcs & 80kg with 4pcs
 - Triple: up to 80kg with 2pcs and 90kg with 3pcs
 - Heavy duty: up to 100kg with 2pcs and 120 with 3pcs
- Placement of 2 hinges on top and bottom
- Third hinge placed below the top hinge
- Retain width to height ratio 1:2 on all sizes
- Height limitation depends on system
- Third screw for extra stability on triple hinge
- Heavy duty hinge has eccentric adjustment

MATERIALS

- Full extruded aluminium main body
- Stainless steel pin on standard and heavy-duty hinge
- Stainless steel fixing plates in standard hinge and zamak fixing plates in the rest
- Stainless steel screws
- Galvanized pin on triple hinge
- Polyamide bushings

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005 mat
- Silver powder coating Anodic Ice (CE type)
- Silver powder coating RAL 9006 (PVC type)
- Natural anodization
- Special colors upon request

CERTIFICATION

- Durability:
 - Standard hinge: Tested up to 50.000 cycles
- Corrosion resistance [EN 1670]:
 - Standard hinge: Grade 5 -> 480 hours salt-spray test
 - Rest hinges: Grade 4 -> 240 hours salt-spray test
- Alumil 5 Year Guarantee

HEAVY DUTY EURO GROOVE DOOR HINGES ALUMIL

NEW!
UPDATE

FUNCTION

Euro groove and PVC groove heavy duty hinges for doors with Alumil logo

TECHNICAL FEATURES

- Perfect fit for all euro groove 15/20 and PVC 16mm Alumil doors
- Fully independent 3D adjustment (up/down, side to side and gasket pressure)
- Weight capacity with two hinges:
 - 120 kg for residential use
 - 110 kg for commercial use
 - 100 kg for commercial use combined with a door closer without hold open
 - 90 kg for commercial use combined with a door closer and a limitation arm with hold open
- A third top assembled hinge, close to the upper one, increase weight capacity by 15%. No capacity increase is obtained if the third hinge is assembled in the middle of the door
- Available special anti-theft steel screw
- Available edition of triple hinge

MATERIALS

- Full extruded aluminium main body and fixing plates
- Polyamide bushings
- Stainless steel screws
- Stainless steel AISI 430F eccentric pin

SURFACE COATING

- White powder coated RAL 9016
- Black powder coated RAL 9005
- Silver powder coating Anodic Ice
- Silver anodization
- Special colors upon request

CERTIFICATION

- Certified according to EN 1935:2004 + EC1 2007: Grade 13 (double hinge) or 14 (triple hinge)
- Durability:
 - Grade 7 - Up to 200.000 cycles
 - Individual test: Tested up to 5.000.000 cycles
- Sash mass: 120 kg for double hinge / 150 kg for triple hinge
- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- Suitable for burglar-proof doors [EN 1627]
- Alumil 5 Year Guarantee

HEAVY DUTY DOOR HINGES BY DR HAHN

FUNCTION

External heavy-duty hinges for doors

TECHNICAL FEATURES

- 65mm for all inward and outward opening doors
- Fully independent 3D adjustment without raising or removing the door
- Antitheft system for pin removal with integrated screw
- Versions for thermally broken profiles with screws and for single wall profiles with fixing plates
- Hinges with fixing plates and for uneven sash/frame are with preinstalled spacers
- Fixing plates with 21mm depth for small chambers
- Triple version available for weight up to 220kg
- Drilling jigs available according to the hinge
- Rust proof continuous bearing pin / no necessity for lubrication
- Horizontal adjustment $\pm 2.5\text{mm}$, Vertical adjustment $+3\text{mm}/-2\text{mm}$, gasket pressure $\pm 0.5\text{mm}$

MATERIALS

- Full extruded aluminium body
- Stainless steel pin
- Nylon caps and bushings

SURFACE COATING

- White powder coated RAL 9010
- Black / silver anodized

CERTIFICATION

- Certified according to EN 1935: Grade 14 hinge
- Durability: Grade 7 - Up to 200.000 cycles
- Corrosion resistance: Grade 4 -> 240hours [EN 1670]
- Max certified weight is 180kg
- Suitable for fire/smoke retardant doors [EN 1634-1]
- Suitable for burglar-proof doors [EN 1627]

ALUMIL SD/MD DOOR HINGE

FUNCTION

Heavy duty Alumil Supreme Door hinge

TECHNICAL FEATURES

- Fully independent 3D micro-adjustment (height, side to side and gasket pressure)
- Remains aligned even when fully adjusted
- Easy installation without any inserts in the chambers
- Same hinge for right and left and inward-outward application
- Burglar proof pin
- Self-taping screw or rivet application (both included in the kit)
- Tested up to 160kg
- Triple hinge design for enhanced stability
- Complete fixing set and installation instructions in one package

MATERIALS

- Full extruded aluminium main body
- Stainless steel pin
- Glass reinforced bushings
- Full stainless steel fixing screws
- CNC machined adjustment plate

SURFACE COATING

- Silver anodized
- Inox anodized
- Black anodized

CERTIFICATION

- Tested according to EN 1935
- Durability: Independent test - Grade 7 -> 200.000 cycles - 160kg
- Alumil 5 Year Guarantee

ALUMIL PIVOT HINGES FOR SD DOORS

NEW!
UPDATE

FUNCTION

Pivot hinges for Alumil Supreme door systems SD77 and SD115 with Alumil logo

TECHNICAL FEATURES

- Allow a door to pivot in both directions
- Vertical rotation axis not in the side but in the inner of the sash
- Carry more weight than traditional hinges because the weight of the door is supported by the bottom unit and the floor rather than the doorframe.
- Perfect choice for a large and heavy door
- Provide great aesthetics
- SD77 hinges can be used for M35 and P150 Office systems

SD77 Mechanism

Low Pivot Mechanism

Upper Pivot Mechanism

NEW!

“ALLE-RETOUR” HINGES FOR SWING DOORS

FUNCTION

Indoor and outdoor installation hinges for swing doors

TECHNICAL FEATURES

- Easy installation
- Maximum opening angle: 180°
- Automatic door return with adjustable power via the caps
- Designed for 40mm and 50mm door thicknesses
- Loading capacity for door width 0,6 - 1m according to the diagrams
- High performance spring hinges
- Spring system is composed of set of blades that works by torsion
- The quality of materials used, offers high resistance to breakage and deformation and optimum elasticity

Installation with screws

EX-7981224832
or
EX-7981224838

Door thickness 40mm

Door thickness 50mm

Compatible with systems:
M9400, M15000

MATERIALS

- Anodized aluminium body
- Zamak adjustable cap
- Polyamide washer
- Stainless steel AISI 304 inner axle
- Inner spring with steel blades set

SURFACE COATING

- White powder coating RAL 9016
- Black / Silver anodized

CERTIFICATION

- Production based on ISO 9001:2015
- Durability: Tested up to 500.000 cycles
- Alumil 5 Year Guarantee

HORIZONTAL PIVOT HINGES

FUNCTION

Standard horizontal euro groove pivot hinges for opening windows

TECHNICAL FEATURES

- Pivoting hinges allow minimum sash intrusion and maximum opening
- For sashes up to 80kg
- Placement of hinges at the middle of the verticals
- Lever allows for full opening or blocks the opening at 30° with color indication
- Packaged in pairs
- Full opening allows for easy cleaning of the outside
- Locking points may be used only below the hinge line
- Hinges are not fitted on vertically pivoting windows
- Tested for SMARTIA M15000 and SUPREME S77

Application of profiles

MATERIALS

- Extruded aluminium main body and plates
- Low friction internal plate
- Anti-corrosion pin and other fixings

SURFACE COATING

- White powder coating RAL 9010
- Black powder coating RAL 9005
- Silver satin anodized

CERTIFICATION

- Individual test according to EN 13126-09:2013
- Durability: Grade 5 -> 25.000 cycles for sash 80 kg
- Corrosion resistance: Grade 5 -> 480 hours salt-spray test
- Alumil 5 Year Guarantee

Parts included in one pair

HEAVY DUTY PIVOT HINGES

FUNCTION

Heavy duty horizontal and vertical pivot hinges for euro groove systems

TECHNICAL FEATURES

- Available in both vertical and horizontal pivot versions
- Convenient hardware adjustment:
 - adjustable friction-brake integrated in horizontal & vertical pivot hinges ensures a fixed opening angle even in windy conditions
 - height adjustment +3mm (on vertical pivot-hinges)
 - gasket pressure adjustment: ± 1 mm on all eccentric locking cams
- 180° rotation allowing for easy cleaning
- Space saving solution with half the sash width swinging inwards
- Vertical pivot fittings can be pivoted centrally or eccentrically
- Horizontal pivot hinges are flush with the window in closed position providing great aesthetics
- Transfer rod movement for extra locking points
- Please refer to technical drawings for complete application and machinings
- Horizontal pivot hinges for sash widths 600-2800mm, sash heights 600-2200mm
- Vertical pivot hinges for sash widths 600-1600mm, sash heights 600-2800mm
- Hardware load-bearing capacity tested up to 175kg sash weight
- Perfect fit for SUPREME S77

MATERIALS

- Hardware components from high-quality steel and Zamac die-casting
- Zamac pivot-hinge components are powder-coated
- The steel components consist of stainless alloys

SURFACE COATING

- White powder coating RAL 9016
- Dark brown powder coating RAL 8022
- Anodised silver in F1/EV1 surface-finish
- Zamac die-casting components are subjected to bichromating surface treatment and an additional silver-colored coating

CERTIFICATION

- Certified according to EN 13126-9:2013
- Durability:
 - Grade 3 -> 10.000 cycles (horizontal pivot hinges)
 - Grade 4 -> 15.000 cycles (vertical pivot hinges)
- Corrosion resistance
 - Grade 4 -> 240 hours salt spray test (horizontal pivot hinges)
 - Grade 3 -> 96 hours salt spray test (vertical pivot hinges)
 - Individual zinc die-cast component with bichromating treatment: Grade 5 -> 1,000 hours salt spray test [EN 1670]
- Sash weight: up to 175kg
- In accordance with the REACH regulation (1907/2006/EG) regarding SVHC substances
- DIN EN ISO 9001:2008
- Alumil 5 Year Guarantee

ALUMIL SINGLE POINT DOOR LOCKS

FUNCTION

Single point lock with latch or roller for standard doors with engraved Alumil logo. Hook lock for bi-folding doors

TECHNICAL FEATURES

- 25mm backset with non-adjustable latch
- 30, 35 and 40mm backsets with reversible and adjustable latch
- Roller latch available (extra code) for push open doors which transforms the adjustable latch locks (30, 35 & 40mm) to roller latch locks
- Each set contains a simple inox striker and plastic spacers for correct lock fitment on the sash
- Adjustable striker (extra code) available for all backsets
- Fixing screws included in the package
- Standard DIN cylinder holes for cylinder defender rosette
- Single point lock available also with hook for bi-folding doors

Hook lock
for bi-folding doors

EN 12209: Specifications

MATERIALS

- Front plate in stainless steel AISI 304
- Adjustable striker in stainless steel AISI 304

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Certified according to EN 12209
- Durability: Grade C - 200.000 cycles
- Corrosion resistance: Grade C – 96 hours salt spray test
- Alumil 5 Year Guarantee

ALUMIL 3-POINT DOOR LOCKS

FUNCTION

Three-point inox faceplate door locks with top and bottom locking points for enhanced security

TECHNICAL FEATURES

- Adjustable and reversible latch
- Standard latch interchangeable with roller latch (EX-4407074100)
- Flat forend 24x3mm
- U shaped forend 24x6mm
- Length 1.700mm
- Adjustable strikers included with the lock
- Single throw falling latch (single key turn)
- Available 3 point locks with hooks for bi-folding doors SMARTIA M9800 and M19800

EN 15685: Specifications

MATERIALS

- Stainless steel AISI 304 face plate

MULTI-POINT DOOR LOCKS

NEW!
UPDATE

FUNCTION

Multi-point locking system for doors with additional locking points at top and bottom for enhanced security

TECHNICAL FEATURES

- Available in three versions according to locking type:
 - Automatic latch bolts:** When door is closed, the latch bolts automatically throw 20mm and are secured to prevent them being forced back
 - MR2 version:** 2 massive deadbolts with horizontal locking manual movement for protection against being sawn through
 - P/R version:** Adjustable mushroom cam / roller cam with vertical locking manual movement for optimizing gasket pressure in the upper and lower area thus providing better sealing
- Comes in all standard hole distances, backsets and faceplate versions
- Reversible latch, fully adjustable strikers
- Extra codes for roller latch 35 and 45mm. Not available in automatic version
- Extra codes for lock extensions. Not available in P/R version
- Dimensions on drawing a/b/c/d are based on the descriptions below

ELECTRIC CONTROL OF ALUMIL MULTI POINT DOOR LOCKS

NEW!
UPDATE

FUNCTION

An easy solution to convert multi-point door locks to electric, transforming a simple door into smart

TECHNICAL FEATURES

- Motor is used in multi-point door locks for automatic use.
Nominal Power Supply: 12 V AC / 12-24V DC
- Motor contains cable and connectors
- Ability to use button for the internal side of the system
- 2 available solutions for easy use:
 - Σπирάλ τροφοδοσίας και τροφοδοτικό (βασική λύση)
 - Ανέπαφη κεντρική μονάδα ελέγχου για απολύτως κρυφή εφαρμογή (αναβαθμισμένη λύση) χωρίς την ανάγκη έξτρα τροφοδοτικού

Electric motor

Solution A

Cable duct & power supply

Solution B

Wireless power and data transmission with strike plates

NEW!
UPDATE

MATERIALS

- Deadbolt hardened inox steel
- Front and striking plate stainless steel

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Alumil 2 Year Guarantee

AUTOMATIC ELECTROMAGNETIC LOCKING SOLUTION

NEW!
UPDATE

FUNCTION

An excellent locking with an automatic electromagnetic lock, which transforms a simple door in a smart access and makes it even safer and more functional thanks to its performance

TECHNICAL FEATURES

- Available both Fail Secure mode (normally closed) and Fail Safe mode (normally open) versions in case of power failure
- Comes with cylinder hole and 8mm spindle for manual open in case of power failure
- Auto-lock function when sash is in closed position
- A deadbolt with a 20mm extension and Ø14mm diameter ensures a high anti-intrusion security
- Cooperation between striking plate and lock needs to be: 4-9mm
- Power supply from 8 to 30 Vdc
- Horizontal installation for sliding systems
- Adjustable timings:
 - door opening time: 1÷180sec (15sec default)
 - delayed closure time: 1÷60sec (1sec default)
- Ability to convert to smart lock using fingerprint scanner
- A sliding system can easily be converted into entrance door (e.g. use in hotels, villas, etc.)
- Button can be used on the inner side of the system

ELECTRIC LATCH PLATE

FUNCTION

The latch plate is permanently released upon electrical contact. Locking function is restored upon the door being opened and closed again. With hold open lever

TECHNICAL FEATURES

- Fafix adjustable latch (5mm.)
- Reversible
- Hold open function
- On-off function to set the open position time
- Low core dimension for all use
- Slide, made a wedge (permanent release), make easy latch bolt released
- Power supply unified version alternate current and direct current
- Long life span 250.000 cycles
- Input from 0.5 to 0.8 A

Fafix – adjustable latch

ON-OFF and Hold-open

MATERIALS

- Zamak

SURFACE COATING

ADJUSTABLE ELECTRIC LATCH PLATE

ELECTRIC CONTROL OF ALUMIL MULTI POINT DOOR LOCKS - KEYPAD

NEW!
UPDATE

FUNCTION

Electric unlock operation of the Alumil range automatic multi point door locks via the use of keypad

TECHNICAL FEATURES

- Keypad made of glass in 3 color variants, stainless steel grey, white and anthracite
- Up to 99 different four-to eight – digit number sequences
- Outdoor use, IP54
- Perfect integration into the design of doors
- Status info via 2 LEDs
- 2 available versions for access control which differ in the power transfer from the frame to the sash:

Basic Version: with cable transfer (differs from fingerprint scanner solution)

Advanced Version: no visible contact between the frame and the sash

- main access control device is consisted of 2 parts, which come into electrical contact when the door closes (compatible with both SecureConnect 50 and SecureConnect 200)
- each main access control device requires 2 strike plates (leaf-side and frame-side) in order to cover the 2 frontplates (extra codes)

ELECTRIC CONTROL OF ALUMIL MULTI POINT DOOR LOCKS

NEW!
UPDATE

FUNCTION

Electric unlock operation of the Alumil range automatic multi point door locks via the use of fingerprint scanner

TECHNICAL FEATURES

- The fingerprint lock kit (1) contains a) the fingerprint scanner and b) the motherboard. It can be unlocked either by fingerprint or Wi-fi
 - Storage of up to 100 fingerprints (4 fingers per user)
 - Attractive minimal design
 - Remote opening and push notifications
 - Data storage in the event of a power failure
 - Maximum security through encrypted data interface
- 2 available covers in INOX and black color with Alumil logo
- The motor (2) is installed on the automatic lock and is connected to the motherboard. The code contains the cable.
- 2 available versions for access control which differ in the power transfer from the frame to the sash (3):

Basic version: with cable transfer

Advanced version: no visible contact between the frame and the sash (Main Access Control)

- The main access control device is consisted of 2 parts, which come into electrical contact when the door closes
- Each main access control device requires 2 strike plates (leaf-side and frame-side) in order to cover the 2 frontplates (extra codes)

SINGLE POINT DOOR LOCK "COMBO"

FUNCTION

Single point door lock for balcony windows with the potential of additional locking points at top and bottom for enhanced security

TECHNICAL FEATURES

- Coupled with rod via the specific connection adapters
- Enables making multipoint perimeter locking
- Bolt, spring latch and adapters operated with the handle
- Locking and unlocking the handle using the key
- Spring latch reversible with 10mm protrusion
- Compatible with 8mm door handles EX-38097610xx by the use of extra accessory EX-3808833600 (1 piece per handle or 2 pieces per handle pair)
- Available in 2 different backsets, 35 and 45mm
- Bolt with thickness of 6mm and stroke of 20mm
- Stroke of adapters is 18mm

LEVER SHOOT BOLT FOR DOUBLE COPLANAR DOORS

FUNCTION

Lever shoot bolt solution for passive leaf of coplanar doors

TECHNICAL FEATURES

- Locking and unlocking function
- When you pull the Lever Shoot Bolt the passive leaf unlocks
- Backset multiple, forend width 24mm
- Double direction throw 18mm
- Complementary accessories needed to complete the solution:
 - Lipped striker for vertical rod
 - Passive leaf control lock
 - Guide plate for vertical rod
 - Floor striker
 - Tube with end plug
 - Solid vertical rod
- When the passive leaf is brought into locking position, the switch lock automatically triggers the locking of the shoot bolts
- This automation prevents the floor of being damaged when closing the passive leaf

MATERIALS

- Stainless steel forend
- Steel folding lever and lock case
- Galvanised rods

SURFACE COATING

- Stainless steel finish

CERTIFICATION

- Certified according to EN 12209:2003

DOOR STOPPERS

FUNCTION

An excellent solution to prevent a door from opening too wide and damage the surface behind

TECHNICAL FEATURES

- Should be placed before the end of the path of the door
- Available in two types with:
 - Transparent rubber, so as not to harm the door surface
 - Magnet, in order to keep the door open
- Elegant design
- Door stopper fixing screws are not visible
- Fixing screws included in the package

Magnetic door stopper

Door stopper with transparent rubber

MATERIALS

- Brass stopper with transparent rubber
- Zamak magnetic stopper

SURFACE COATING

- Mat nickel

CERTIFICATION

- Corrosion resistance: Grade 4 -> 240 hours salt-spray test [EN 1670]
- Alumil 5 Year Guarantee

Installation

EX-4711019000	DOOR STOPPER WITH TRANSPARENT RUBBER

ALUMIL PROFILE CYLINDERS

FUNCTION

Standard and Security euro profile cylinders for all types of locks

TECHNICAL FEATURES

- Standard cylinders (5-pin) with 3 vertical insert keys
- Security cylinders (6-pin) with 5 horizontal insert keys
- High security cylinders (6-pin) with 1+5 keys and mobile element
- Code numbering on key neck
- High security key with long – defender rosette – neck
- Steel bolt M5x50 included
- Cylinders available in knob, half, key alike and master key systems upon request
- Alumil logo on neck for most common used codes
- Defender available for high security against drilling
- Flush rosettes available for coplanar systems with external aluminum panel or glass

MATERIALS

- Full brass body

SURFACE COATING

- Nickel plated

CERTIFICATION

- Certified according to EN 1303
- Durability: Grade 6 - 100.000 cycles
- Corrosion resistance: Grade C - High corrosion resistance
- Key related security:
 - Grade 4 for standard cylinders
 - Grade 5 for security cylinders
 - Grade 6 for high security cylinder
- Attack resistance for security & high security cylinders:
 - Grade D
 - RC 2 [EN 1627]
- Instituto Giordano certification for standard cylinders
- ICIM certification for security cylinders
- SKG 3 Stars certification for high security cylinders
- Alumil 5 Year Guarantee

SMART CYLINDER "LIBRA"

FUNCTION

An excellent solution to access main entrances via "smart" devices while offering high security

TECHNICAL FEATURES

- Compatible with Alumil MD67 and SD77 inward and outward opening typologies
- Quick and easy installation in the same way standard cylinders are installed; No milling required
- Installed in both new and existing doors
- Elegant design
- No cabling required; battery operated
- Common CR123 battery (included in the package) with life up to 2-years (20.000 openings)
- High antitheft security
- Easy software management
- Provides event log of last 1000 openings and opening attempts
- No data loss if it runs out of battery
- Quick visualization of battery status
- Active users up to 300
- Access is triggered via Bluetooth devices, such as smartphones and cards
- Allows virtual key transfer via web to allow access even from remote
- Ideal for offering access remotely in renting apartments, such as Airbnb
- Available software named "Argo" on iOS or Android
- High protection against water and dust, over IP66
- Optical and acoustic signaling
- Drilling protection

MATERIALS

- Brass body

SURFACE COATING

- Glossy black

CERTIFICATION

- Certified according to EN15684:2012
- Durability: Grade 6 -> 100.000 test cycles
- Electronic key related security: Grade F -> >1.000.000.000 electronic codes
- Attack resistance: Grade 2
- SKG certified Class 3 STER
- Alumil 5 Year Guarantee

MECHANISM OF TRICKLE VENTILATORS

FUNCTION

Surface mounted noise reducing ventilators for opening and sliding systems

TECHNICAL FEATURES

- Can provide up to 44db sound reduction in open position, depending on combination
- The solution contains the ventilator (inner part) and the canopy (outer part)
- Available in a range of combinations to suit different acoustic specifications
- Suitable for use in domestic or non-domestic installations
- Ideal for retrofit applications, over an existing slot
- High performance gasket combined with compression closing action improves sealing in adverse conditions
- Can be mounted to deflect air upwards or downwards
- The Equivalent Area of air that passes through the products is 2500mm²
- For optimum performance, the ventilator should be installed on a flat surface free from defects
- Silicon should be used along all edges to achieve the desired acoustic result

Acoustic rates of combinations

Canopy	Ventilator	Open Position (db)	Closed Position (db)

EX-47050050xx	EX-47052230xx	38	55
EX-47050050xx	EX-47052250xx	40	53

MATERIALS

- Main body made from aluminium 6063A T6
- Component plastic parts made from POM

SURFACE COATING

- White powder coating RAL 9010 Semi-gloss
- Black powder coating RAL 9005 mat
- Special colors upon request

CERTIFICATION

- Certified according to BS EN 13141-1:2004 (airflow, air leakage and weather tightness)
- Certified according to BS EN 10140-2:2010 (sound reduction)
- Alumil 5 Year Guarantee

DOOR WIND SEALS

FUNCTION

Drop down and threshold seals for all Alumil doors. Wind seals provide sealing from wind, dust and noise

TECHNICAL FEATURES

- Perfect fit for all Alumil door systems
- Automatic drop down seals with single (Alu-plus) and double plungers (Auto-Seal)
- Graduated scissor mechanism for hinge side drop first ensures no seal dragging
- Adjustable drop pressure for perfect insulation
- Double plunger mechanism removable from hinge side after installation
- Double plunger includes closing plug, strikers
- Double plunger can be cut up to 110mm in length
- Single plunger can be cut up to 150mm in length
- Automatic drop down seals will not seal perfectly from water
- Threshold seals for floor and door
- Floor threshold seal to be installed with silicone or screws
- Well installed floor threshold seals from fire, smoke, water, wind and noise
- Threshold can be fixed after door installation
- 15mm high threshold complies with EU standards

MATERIALS

- Extruded aluminium 6060 T6 main body
- Polyamide PA 20% glass caps and actuators
- Galvanized plunger spring
- Self extinguishing TP seal for plungers and silicone seal for threshold

SURFACE COATING

- Aluminium mill finish for automatic drop down seals
- Silver anodized aluminium threshold
- Threshold seal and endcaps in Grey RAL 7035

CERTIFICATION

- Acoustic sealing certification by IFT Rosenheim for automatic plungers
- Durability testing for 200.000 closing cycles
- Alumil 5 Year Guarantee

PANIC BAR MECHANISM STANDARD ALUMIL

NEW!
UPDATE

FUNCTION

External application panic bar mechanism for single and double, standard and fire doors

TECHNICAL FEATURES

- Reversible for left and right doors
- Available panic bar or push pad
- Steel bar available in: black, red and metal grey
- Modular system for 1, 2 and 3 locking points
- Second sash locking top and bottom
- Easy to install after fabrication and installation of the sash
- Small sizes for minimal aesthetic impact
- External handle with lock available
- Vertical rods with covers

PANIC BAR MECHANISM CONCEALED

FUNCTION

Concealed panic exit device for standard and fire rated doors with security mortise lock

TECHNICAL FEATURES

- Reversible for left and right doors
- For single leaf doors with metal profile
- Suitable for fire rated doors
- Can be combined with external handle
- 1 or 3 locking points
- U-shape or flat forend
- Backset 35mm
- Bar, cylinder, strike plate for lock and external handle are separate codes

EN 1125:2008: Specifications

377B1321AB

MATERIALS

- Stainless steel U-shape and flat forend
- Varnished steel and anodized aluminum bars

SURFACE COATING

- No additional surface treatment

CERTIFICATION

- Certified according to EN 1125:2008
- Durability: Grade 7 -> 200.000 test cycles
- Door mass and closing force: Grade 7 -> 200kg & 50 N maximum closing force
- Security: Grade 2 -> 1000 N force on the leaf in opening direction
- Suitability for use on fire/smoke doors: Grade B -> Suitable for use on smoke and fire door assemblies
- Corrosion resistance: Grade 3 -> 96 hours salt spray test [EN 1670]
- Alumil 5 Year Guarantee

OPENING SHUTTER ACCESSORIES

FUNCTION

Shutter accessories to fit Alumil opening shutter systems

TECHNICAL FEATURES

- Perfect fit for Alumil 9400 shutter systems
- Shutter hinges in all sizes to accommodate all wall thicknesses
- Shutter hinge size refers to dimension when hinge is fully open (total wall width after the frame)
- Tested for 80kg per sash, 3 hinges to be used in large openings
- Folding shutter hinges for 3 and 4 sash typologies allows for the outer sash to fold flush on top of the inner one
- Shutter wall holders to prevent shutters from closing under wind loads
- Shutter mechanisms with external or internal rods
- Internal rod mechanism works with handle cremone
- Internal rod mechanism has flat and deep keepers available
- External rod mechanism works with lever
- Shutter mechanisms with top and bottom locking points
- Rods are cut to length

MATERIALS

- Extruded aluminium main body for hinges
- Polyamide stops
- Polyamide bushings
- Galvanized pin
- Galvanized fixings

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005
- Silver powder coating (anodic ice)
- Special colors upon request

CERTIFICATION

- Alumil 5 Year Guarantee

ADJUSTABLE SLAT MECHANISM FOR SHUTTERS

FUNCTION

Mechanism of rotating slats for enhanced shading

TECHNICAL FEATURES

- Rotation with lever or knob
- Perfect fit for 25 and 35mm width grooves
- 65mm shutter slat
- 5m long mechanism to be cut at the required length
- Reducer used for bottom fixed shutter slat
- Fast and easy installation
- Robust solution

MATERIALS

- Extruded aluminium main body
- Plastic slat fixing points
- Inox rods
- Zamak gears
- Plastic compensators

SURFACE COATING

- Black anodized main body

CERTIFICATION

- Certified according to EN 13659 EU
- ISO 9001:2008
- Alumil 5 Year Guarantee

MANUAL SKYLIGHT MECHANISM

FUNCTION

Manual skylight mechanism for inwards and outwards opening windows

TECHNICAL FEATURES

- Lever mechanism
 - Opening width of 170 mm which can be adjusted
 - Easy installation: scissors and rods can be installed from the front
 - Secure casement locking due to locking integrated in scissors
 - Convenient window cleaning from inside and outside due to easy scissor disengagement
 - Inward opening bottom-hung and top-hung windows
 - Number of scissors according to leaf width
- Hopper mechanism
 - Suitable for single bottom hinged windows up to 1.5m width
 - Quick and easy installation. The conduit preparation tool is not required
 - Maximum opening 250mm; the kit is provided with already cut spent travel tube
 - The small section of the conduit allows only 50mm radius bend: it is usually possible to install the conduit on the window frame
- Crank mechanism
 - Suitable for operating skylights and domes up to 200kg weight
 - Maximum stroke 310mm
 - Complete bracket set included
 - Operation by crank handle

Lever mechanism

APPLICATION LIMITS

Number of scissors	Leaf width a (min.)	Leaf width a (max.)	Leaf height b (min.)	Leaf weight (max.)	Panel weight (max.)
1	380 mm	1200 mm			40 kg/m ²
2	1201 mm ¹	2400 mm	250 mm	80 kg	
3	2401 mm ²	3600 mm			25 kg/m ²

Hopper mechanism

Crank mechanism

MATERIALS

- Galvanized rod
- PVC coating rod

SURFACE COATING

- White RAL 9016
- Black
- Silver

CERTIFICATION

- Alumil 5 Year Guarantee

FUNCTION

The electronic control boards for rolling shutters and skylights provide remote control for 230Vac & 24Vdc motors

TECHNICAL FEATURES

- Available in 2 versions for 230Vac and 24Vdc motors
- Easy installation according to installation schemes
- Button command input
- Intended for small domestic rolling shutters and skylights
- Compact design
- For ac version
 - Each set includes 2 Alumil logo 4-channel remotes
 - Built in 433.92 MHz receiver
 - Maximum motor power 300W
- For dc version
 - Maximum number of 12 transmitters and 3 sensors per receiver
 - Extra codes for remote control with 1 or 5 channels

ALUMIL FLAT FRAME INSULATING PROFILE

NEW!
UPDATE

FUNCTION

The flat frame insulating profile allows for water drainage and thermal insulation in flat frame installations

TECHNICAL FEATURES

- Does not age or rot
- Excellent resistance to chemicals
- Easy to cut without break-outs on edges
- Not flammable (b2) / drop free
- Very low thermal conductivity as low as 0.07 w/(mk)
- Especially designed for Alumil Systems with flat frames
- Can be made to order for other applications

ALUMIL NRG BARS

FUNCTION

NRG bar is a premium performance rigid thermoset phenolic insulation profile that improves Uf values up to 20%

TECHNICAL FEATURES

- Thermal conductivities as low as 0.020 W/mK
- Negligible smoke obscuration
- Unaffected by air infiltration
- Resistance to the passage of water vapour
- Manufactured without the use of CFCs/HCFCs
- Manufactured with a blowing agent that has zero Ozone Depleting Potential (ODP) and low Global Warming Potential (GWP)
- Easy to handle and install due to membrane
- All profiles are available in 1.2m lengths

MATERIALS

- Thermoset modified resin

SURFACE COATING

- No additional surface coating

CERTIFICATION

- BS / I.S. EN ISO 14001: 2004
- BS / I.S. EN ISO 9001: 2008
- BS / I.S. OHSAS 18001: 2007
- BS 8102: 1990
- BS 8215: 1991
- BS / I.S. EN 62305: 2006
- BS / I.S. EN 826: 1996 > 120kPa at 10% compression
- BS EN 12086:1997 / I.S. EN 12086: 1998 > 300 MNs/gm
- Alumil 5 Year Guarantee

ALUMIL J-BOND ALUMINIUM COMPOSITE PANELS

FUNCTION

Aluminium composite panels for facades and various exterior and interior uses

TECHNICAL FEATURES

- Light weight and flat surface product easy to work with, to drill, cut and bend
- Provides sound insulation and it is durable in weather conditions, erosion, deterioration, pollution, fire and water
- Exceptional resistance in acids and alkaline
- Simple maintenance
- Environment friendly as a recycling material
- High quality production ensures excellent bonding and quality
- Long term sample testing from every production
- Panels covered with easy to peel protective layer
- Standard dimensions 1.25x3.2m.

MATERIALS

- PVdF resin paint
- 3mm polyethylene core
- 0.5mm aluminium cover on both sides

SURFACE COATING

- All PVdF resin painted colors
- Standard RAL, metallics and sublimation colors
- Pre-painted certified and guaranteed aluminium sheets

CERTIFICATION

- 10 Year color peel off Guarantee
- 10 Year bonding Guarantee
- Fully certified, top quality raw materials
- ISO 9001, ISO 14001, OHSAS 18001

ALUMIL POLYCARBONATE SHEETS

FUNCTION

Multi use building material for interior and exterior use

TECHNICAL FEATURES

- Available in multi-wall and solid sheets
- Available in custom dimensions to minimize excess
- 4, 6, 8, 10, 16, 20, 25mm for multi-wall
- 2, 3, 4, 5, 6, 8, 10mm for solid sheets
- Lightweight, no-brake, heat insulating, sound insulating, UV protected
- Perfect for atriums, sound barriers, kiosks, parkings
- Dust repelling, easy to clean
- Fully tested and calculated for solar heat gains
- Light transmission, shading coefficient, thermal expansion
- 2 types available (POLYbat, EuroCarb)

MATERIALS

- Polycarbonate
- UV resistant top side (indicated)
- Double UV resistant side upon request

SURFACE COATING

- Color is part of the raw material
- Colors for multiwall: clear, white, green, blue, bronze
- Colors for solid: opal, clear, bronze
- Easy peel protective film on all surfaces

CERTIFICATION

- Class A fire reaction ASTM E-84
- Alumil 10 Year Guarantee on EuroCarb
- Alumil 5 Year Guarantee on POLYbat

EuroCarb sheets

FUNCTION

WOODEE is ALUMIL's proposal for premium quality wood-composite decking, fencing and cladding applications. Truly ideal for decking and flooring constructions by swimming pools, patios and winter-gardens, balconies and terraces, piers and coastal sidewalks, applied in hotels, outdoors facilities and many more.

TECHNICAL FEATURES

DECKING available in :

- 3 profiles: DS- Deck standard /DW-Deck wide /DO-Deck overlap
- 5 textures: LINEAR/ VINTAGE/ AMAZON/ AMAZON PLUS/ FLAT PLUS

CLADDING available in :

- 1 profile
- 2 textures: VINTAGE/AMAZON

FENCING available in :

- 3 profiles: 120x11mm
- 3 textures: VINTAGE/AMAZON / FLAT PLUS

FINISHING available in :

- 1 profile: 90x16 mm
- double texture: PLAIN and AMAZON

TRANSOM available in :

- 2 profiles: 50x30mm , 50x50mm

MATERIALS

- Decking Cladding Fencing profiles
 - High quality 100% virgin HDPE (High Density Polyethylene)
 - Wood powder from sustainable forest (PEFC)
 - High UV resistance color pigments
 - No environmentally harmful substances
- Stainless steel clips including stainless steel screws

SURFACE COATING

- No additional surface coating is applied

CERTIFICATION

- 25-year warranty is applied to all products against wood-decaying factors (wood-destroying fungi, rot and insects under normal conditions).
- For all other cases, the standard 5 Year Guarantee applies
- Manufactured deck boards comply with EN 15534-4 and 15534-1

Tests	Value	Standards
Flexural strength	21,7 MPa	min. 20 MPa
Shrinkage by thermal test (100°C, 60 min, longitudinal direction)	0,02%	max. 0,1%
Impact strength (resistance to impact by falling mass in cold)	0% damaged	max. 1,0%
Slipperiness (friction coefficient)	0,5-0,6	min. 0,3%
Swelling in water (24 hrs, 20°C)	1%	max. 1,5%
Swelling up after moisture resistance test by cycling	1,10%	max. 2,0%
Flexural strength after moisture resistance test by cycling	20,3 MPa	min. 17 MPa
Coefficient of Thermal Linear Expansion ASTM D696	2,88* 10 ⁻² mm/m/°C	
Reaction to fire	Dfl-s1	
Density	1210 kg/m ³	
Surface Hardness (Jweil)	Very resistant material	
Fertilizer resistance	No attack in the initial state and also over time	
Resistance to fungus	Very durable material, the aging tests do not affect the durability	
Dimension Tolerance	Length +/- 10 mm, Width +/- 2 mm, Thickness +/- 1 mm

FUNCTION

WOODALUX is an innovative building material, suitable for creating decorative and shading structures for long-lasting natural upgrading of buildings & outdoors constructions. Additionally WOODALUX offers unique louvers solutions for pergolas, fencings and other structures.

All profiles can be placed vertically, horizontally or in angled position offering wall cladding and sturdy shading solutions in a more natural way.

TECHNICAL FEATURES

- Available in 8 profiles, applicable for pergolas, fencing, cladding structures as well as many customizations:
 - 24x120mm pergolas, cladding, fencing etc.
 - 25x90mm fencing etc.
 - 32x40mm cladding, FC60 fencing, etc.
 - 32x60mm cladding, FC60 fencing, etc.
 - 32x80mm cladding, FC60 fencing, etc.
 - 32x80mm FC10 fencing, etc.
 - 32x120mm pergolas, cladding, FC60 fencing etc.
 - 45x300mm building solar shading (M5600)
- Two available option for end covers (Type 1: aluminium, Type 2: woodalux)

MATERIALS

WOODALUX consists of aluminium profiles capped with wood composite material.

- The outer layer of profiles consists of 20% wood powder and 70% HDPE (high density polyethylene) plus 10% other compounds all of which are compliant with "REACH" environmental standards.
- The core is of hardened Aluminium-6063
- The holder and end caps are of Aluminium-6060

SURFACE COATING

- No additional surface coating is applied
- End covers in powder coated aluminium

CERTIFICATION

- Alumil 10 Year Guarantee
- All the compounds include neither phthalates nor phosphorus flame retardants in compliance with Regulation (EC) 1907/2006 (REACH)
- Tested in:
 - Color stabilization and aging UV -> 4200 hours
 - Weathering conditions (ISO 4982-2- 1500 hr)
 - Corrosion resistance: 1008h Acetic Acid Salt Spray test
 - Peeling off under harsh conditions and resistance to wood decaying factors (DIN EN 13696:2009)
 - Concentration in heavy metals (EN 71-3:2013)

ALUMIL SEALANTS AND ADHESIVES (PART 1)

NEW!
UPDATE

FUNCTION

Top quality materials for complete fabrication, installation and maintenance of Alumil Systems

TECHNICAL FEATURES

- According to the application, the correct product should always be used in order to achieve high quality and long-lasting results
- All products have to be used during their shelf-life to achieve proper results
- **Acrylic putty** to be used for interior applications. Application in extreme temperatures may effect the setting time and overall appearance (cracking). Can be painted
- **Acetic silicone** is appropriate for gluing and sealing. While setting a 5% volume shrinkage will occur. It should always be applied on clean and dry surfaces. Cannot be painted
- **Neutral silicone** is ideal for aluminium construction. No smell allows indoor applications, excellent gluing and sealing properties without shrinkage while setting. Cannot be painted
- **Hybrid joint sealant** is a hybrid between acrylic putty and silicone. It is ideal for aluminum systems as it offers excellent bonding and elasticity. It does not shrink when setting. It may be used for gaps between wall and window as well as 45° cut sealing. It slightly expands for a perfect seal. Can be painted
- **Brugal**: Spray for covering aluminum surfaces in order to enhance the anticorrosion properties. Especially used at painted or anodized profiles after performing cuttings or millings
- **Silicon spray**: The solution for lubrication and maintenance of plastic parts or mechanism moving parts

ALUMIL SEALANTS AND ADHESIVES (PART 2)

NEW!
 UPDATE

FUNCTION

Top quality materials for complete fabrication, installation and maintenance of Alumil Systems

TECHNICAL FEATURES

- According to the application, the correct product should always be used in order to achieve high quality and long-lasting results
- All products have to be used during their shelf-life to achieve proper results
- **PU foam** offers good insulation and stability between the structures. Mechanical fixing should always be used, as expanding foam may interfere with the leveling of the frame. PU foam cleaning spray is available
- The **Alumil cleaning agent** is formulated in order not to corrode aluminum paint and anodizing. It may be used for joint sealant, silicone, acrylic putty and glue residues as well as cutting oils and pen markings
- **Crimp corner glue** is PU based and sets with humidity. Corners should always be sprayed with a mist of water to help the glue set. It expands slightly when setting. Corner crimp glue can also be used in other applications since it offers excellent bonding strength with limited elasticity
- All 280ml cartridges are used with standard caulking guns
- **One component adhesive-silicone** for fast setting for demanding applications, utilized when sulfur glue is used for the secondary glazing sealing. Allows quick transportation of the sashes as it drastically decreases setting time. Primer is needed for powder coated profiles
- **Cyanoacrylic adhesive**: offers quick adhesion due to polymerism. Ideal for gaskets, plastics, glasses and metallic parts
- **Weathersealing silicone**: A one-part, medium-modulus, elastomeric sealant designed for general weathersealing
- **Structural glazing sealant**: A one-part silicone sealant used for structural glazing
- **Glue for alum.-polyureth.:** 2 components in ratio 4kg (part A) / 1kg (part B)

Example of using Alumil adhesives during corner joint

Example of using cyanoacrylic adhesive for gaskets

ALUMIL SYSTEM MOUNTING ACCESSORIES

FUNCTION

Top quality accessories for complete mounting, leveling, glass shimming, frame fixing and insulating of Alumil Systems

TECHNICAL FEATURES

- **Glass setting block** helps on glass shimming the frame on the structural element
- **Frame installation anchor** aims to transfer all the calculated loads to the structural element
- **Joint cord** prevents deformations and therefore the stressing of the frames by the structural elements. Polyethylene is a thermal insulating material that does not allow liquid sealants to stick on it. A hollow surface is created in the fluid sealing material when pressed on the joint cord. This results in proper bonding only between the frame and the wall. This joint will be able to operate without being cut for decades
- **Air and water sealing tapes** are flexible foils for vapor open and air- and driving rain tight sealing of connections around windows, between the frames and the wall. They are very practical in their application
- **Pre-pressed self-swelling insulation tapes** with the pressure they exert on the walls, they ensure waterproofing against liquid element but at the same time they allow the escape of water vapors under the frame. They are also heat insulating and can replace the use of polyurethane if the application allows so
- **Butyl aluminum tapes** are a very tight material with high mechanical strength. Due to this property, tapes are placed on the floor frame so that aided by the weight of the frames it achieves proper sealing

MATERIALS

- Full material analysis upon request

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL SYSTEM SCREWS

FUNCTION

Screws for certified fabrication of Alumil systems

TECHNICAL FEATURES

- All Alumil systems are certified with Alumil screws
- A2 stainless screws do not contaminate the aluminium and are highly resistant to corrosions
- Galvanized screws are stronger and more elastic
- Self drilling screws allow for faster application, but only single layered fixing is possible
- Tapping screws require pre-drilling

MATERIALS

- A2 Stainless steel (AISI 304)
- Standard steel cold dipped galvanized

SURFACE COATING

- No additional surface coating

CERTIFICATION

- DIN / ISO Certified
- Alumil 5 Year Guarantee

BULDEX & YTONG SCREWS

NEW!
UPDATE

FUNCTION

Screws for certified fabrication of Alumil systems

TECHNICAL FEATURES

- Torx Concrete Screws (Buldex)
 - Countersunk head
 - Torx socket
 - Quick fastening on materials such as concrete, cement, stone, brick etc
 - No wall plugs required
- Ytong Anchor
 - Countersunk head
 - Anchoring with locking through friction between the anchor sleeve and the base material
 - High load-bearing capacity due to expansion in four directions
- All Alumil systems are certified with Alumil screws

Torx concrete screw

NEW!
UPDATE

YTONG anchor

MATERIAL

- Standard ατσάλι γαλβανισμένο εν ψυχρώ

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Certified by DIN / ISO
- Alumil 5 Year Guarantee

ALUMIL SYSTEM ANCHORS

FUNCTION

Screws for certified fabrication of Alumil systems (fencing, railing etc)

TECHNICAL FEATURES

- Anchor FH II SK
 - CSK head
 - ideally suited to fix railings, staircases, and ladders in cracked and non-cracked concrete is set in the time-saving through-type installation
 - when tightening the anchor, the cone is pulled into the expansion sleeve and expands it against the hole wall
 - the black plastic ring prevents the anchor from rotating and absorbs the torque slippage
- Anchor FBS II SK / US
 - the perfect concrete screw for top installation comfort
 - The special saw tooth geometry enables fast cutting into the concrete
 - Drill hole cleaning is not required for installations in ceilings or floors
 - Torx socket
- Anchor Ytong
 - CSK head
 - Anchorage via friction locking between anchor sleeve and base material
 - High load capacity thanks to expansion in four directions
- All Alumil systems are certified with Alumil screws

CORNER CONNECTORS DIE CAST

FUNCTION

Corner cleats for certified fabrication of Alumil systems

TECHNICAL FEATURES

- 3 versions available
- **Corner connector with circular button:**
 - Corner joint with outward spring-loaded buttons
- **Split corner cleat:**
 - Multifunction die-cast aluminum corner joint for screwing, pinning or crimping
 - Philips (Standard Cross) Head on all screws
 - It has also specific tracks for glue running in order to allow perfect sealing and to give the joint greater resistance, preventing pointlessly wasted glue
- **Corner cleat with rectangular buttons:**
 - Threaded corner joint with spring-loaded anchoring buttons facing outwards and tightening screw
- All Alumil systems are certified with Alumil corner cleats

Corner connector die cast with circular button

Split corner connector die cast

Corner connector die cast with square button

MATERIALS

- Die cast aluminium

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL SYSTEM ALUMINIUM ACCESSORIES

NEW!
UPDATE

FUNCTION

Aluminium Accessories by Alumil for complete, tested and certified systems

TECHNICAL FEATURES

- Cut accessories +/-0.5mm based on DIN7168
- Fully automated CNC machining
- Custom packaging

MATERIALS

- Fully certified raw material based on EN 573-03
- Fully certified profiles based on EN 755-02
- Hardness measuring and tension measuring based on EN 10002-1
- Variety of alloys according to accessory use

SURFACE COATING

- Powder coated accessories ISO tested for paint thickness, shine, coloring, and paint application
- Powder coated accessories ISO tested for cupping, bending and impact
- Powder coated accessories ISO tested for acid salt spray, accelerated weather and QUV
- Anodized accessories ISO tested for anodization thickness, sealing and shine

CERTIFICATION

- Qualicoat
- Qualanod
- GSB Master
- Production based on ISO 9001:2008
- Production based on ISO 14001:2004
- Individual accessory design and certification upon request
- Alumil 5 Year Guarantee

ALUMIL SYSTEM COMPOSITES

FUNCTION

Composite materials by Alumil for complete, tested and certified systems

TECHNICAL FEATURES

- Latest technology production processes
- 3D designing and 3D printing prototypes
- Electronically controlled heating and cooling for top material quality
- 5 axis CNC machines for mold production
- Excellent quality material and production ensures form retention and UV resistance
- All thermoplastic accessories are part of the official Alumil system certification
- Compression and Ageing tested between -10 and 100 °C
- Individual accessory design and certification upon request
- The gaskets are covered by silicone after production for ease of installation. Lack of silicone does not affect the gasket properties
- Silicone spray available (Alumil adhesives) for all composite parts

ALUMIL S650 HANDLES WITH LOCKING KIT

FUNCTION

Complete locking solution with handles for Alumil SUPREME S650 PHOS

TECHNICAL FEATURES

- Unique mechanism (gearbox and rods) is available in left/right version (separate code than the handle set)
- Adjustable and extendable locking rods with screw-in stainless tips
- Smooth operation due to anodized internal components
- Available with or without key on handle lever (default solution without key)
- Kit includes all required screws
- Easy to install after window transportation on site
- Easy to remove for maintenance
- Standard kit covers heights up to 3m sash
- Extra rod for higher sashes
- Strikers are separate codes
- Branded with Alumil unique design
- Available in both Standard and Minimal versions

MATERIALS

- Extruded aluminum handles and covers
- Polyamide bushings
- Stainless steel screws and other accessories
- Galvanized rod adjustors
- Aluminum locking rods

SURFACE COATING

- Natural anodized silver
- Black anodized
- Special colors available for Projects (20 pairs minimum)

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL M630 HANDLES

FUNCTION

Complete kit with interior and exterior handles for Alumil SMARTIA M630

TECHNICAL FEATURES

- Easy to install after window transportation on site
- Easy to remove for maintenance
- Excellent cooperation with multi point locks for sliding systems
- Kit includes all required screws
- Branded with Alumil unique design

Assembly of internal handle

MATERIALS

- Extruded aluminum handles
- Polyamide cover cup
- Stainless steel screws and other accessories

SURFACE COATING

- White powder coating RAL 9016
- Black powder coating RAL 9005 mat
- Silver powder coating RAL 9006
- Special colors upon request

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL SF85 SYSTEM HARDWARE

NEW!
UPDATE

FUNCTION

A complete hardware solution for the Alumil SF85, high thermally insulating bi-fold system.

TECHNICAL FEATURES

- All hardware components are specifically designed for excellent fitting.
- Upper and lower carriages are self aligning and with integrated bump stops. Upper carriage is sprung-suspended for perfect sash verticality.
- Lower carriage fitted with obstacle guard, and tested up to 500kg per double sash.
- Double action shoot bolts ensure tight closing on sashes.
- Patented PA-UP1 polymer material for shoot bolts allows for forces up to 1500kg per bolt.
- Bespoke low-height handle with lifting action for all middle sashes. Couples with extruded aluminium pull handle for operation.
- 3 point hook lock for high security
- Choice of door handles from the Alumil collection.
- All hardware are fully anodized for a flawless finish and corrosion resistant.

MATERIALS

- Hardware components from extruded aluminium
- Stainless steel wheels and pins and screws
- Polyamide aligners and caps
- Ultra high strength PA-UP1 shoot bolts
- EPDM Gaskets

SURFACE COATING

- Silver / Natural anodized
- Black anodized

CERTIFICATION

- Alumil 5 Year Guarantee

ALUMIL MF65 SYSTEM HARDWARE

FUNCTION

A complete hardware solution for the Alumil MF 65, high thermally insulating bi-fold system

TECHNICAL FEATURES

- All hardware components are specifically designed for excellent fitting
- Upper and lower carriage are self aligning and with integrated bump stops. Upper carriage is sprung-suspended for perfect sash verticality
- Lower carriage fitted with obstacle guard, and tested up to 500kg per double sash
- Double action shoot bolts ensure tight closing on sashes
- Patented PA-UP1 polymer material for shoot bolts allows for forces up to 1500kg per bolt
- Extra strong 490N magnet holder
- 3 point hook lock for high security
- Choice of door handles from the Alumil collection
- All hardware are fully anodized for a flawless finish and corrosion resistant

MATERIALS

- Hardware components from extruded aluminium
- Stainless steel wheels, pins and screws
- Polyamide aligners and caps
- Ultra high strength PA-UP1 shoot bolts
- EPDM gaskets

SURFACE COATING

- White powder coating RAL 9016 gloss
- Black powder coating RAL 9005 matte

CHILD SAFETY MECHANISM SOLUTIONS

NEW!
UPDATE

FUNCTION

Access control and protection solutions against unwanted use by children for hinged, sliding and lift and sliding windows

TECHNICAL FEATURES

- Special locks with cylinder slot that, when used, prevents the handle from unlocking the door
- It is recommended to use a range knob cylinder on the internal side and a key cylinder on the external (cylinders CDS page)
- **Slidings:** Lock with a cylinder slot available in the height options, 1170 and 1500mm
- **Hinged:** Gears compatible with euro groove mechanisms, installed at the desired height
- **Lift and Slide:** Mushroom lock available in two heights with cylinder slot at a minimum height of 1500mm

MATERIALS

- Steel main body and locking points
- Zamak components

SURFACE COATING

- The individual parts of the mechanism made of Zamak with a two-tone surface treatment and acquire a silver color

CERTIFICATION

- Certified according to
 - EN 13126-3:2011 for slidings
 - EN 13126-8:2006 for hinged
 - EN 13126-16:2008 for LnS
- Corrosion [EN 16710]:
 - Mechanism: Grade 4 -> 240 hours of salty-spray test
 - ZAMAK Components: Grade 5 -> 1,000 hours of salty-spray test [EN 1670]
- 10 years operation guarantee
- Alumil 5 Year Guarantee

CHILD SAFETY ACCESSORY FOR SLIDING SYSTEMS

NEW!
UPDATE

FUNCTION

Child Safety accessory specially designed to prevent children from opening the sliding windows, providing an economical and safe solution. Suitable for Alumil sliding systems.

TECHNICAL FEATURES

- Installed in Alumil sliding systems with vertical distance between the glass inner surface and the sash profile: 7-20mm strictly (see image)
- Recommended installation height: 1800mm
- Placed on the hook or on the side sashes
- Recommended to be used one day after the installation
- The movable part of Child Safety is placed in the middle of the bumper (open position)
- Easy removal

MAGNETIC ALARM CONTACTS

NEW!
UPDATE

FUNCTION

Magnetic alarm contacts for hidden installation in hinged and sliding systems to ensure high security

TECHNICAL FEATURES

- Easy and quick installation
- The hinged set is available with a 3,5m cable version for connecting the wires outside the frame
- Ready for immediate use after installation (plug and play)
- Compatible with smart housing systems
- Hinged packaging includes:
 - Cylindrical reed sensor $\Phi 7$
 - Flange to prevent water ingress from the cable routing hole
 - Cap with Alumil logo
 - Round magnet with a 4.2mm hole
 - Connection cable
- LNS packaging includes:
 - Cylindrical reed sensor $\Phi 7$
 - Magnet holder with Alumil logo
 - Magnet in plastic spacer
- Normal closed operation: it sends a signal when the system opens and the magnet is separated from the sensor
- Maximum distance between Sensor –Magnet: 4cm

ALUMIL SUPREME SYSTEM PUNCHING MACHINE

NEW!
UPDATE

FUNCTION

Alumil pneumatic punching machine for Supreme hinged systems with 5 fixed tools and capability of inserting detachable tools for Supreme sliding systems

TECHNICAL FEATURES

- Designed for cold-pressing profiles in aluminium and/or similar materials
- 5 fixed tools for commonly used punchings on hinged systems
- Available body (extra code) with 6 slots for detachable tools
- Detachable tools available for commonly used punchings on sliding or hinged systems
- Available base for stabilization
- Branded with Alumil unique design
- The year of construction is stated on the plate (with CE marking) affixed to the machine
- The serial number is printed directly on the plate
- Available main punching machine body without integrated extra phases

Pneumatic punching machine

Example of punching of specific tool

Description	Unit of measurement	Value
Cylinder	mm	Ø200
Number of chambers		2
Cylinder stroke	mm	30
Minimum working pressure	Bar	6
Punching force	Kg.	3480

ALUMIL PUNCHING MACHINES

FUNCTION

Manual or pneumatic punching machines to cover the mainly used millings for Alumil systems

TECHNICAL FEATURES

- All hardware components are specifically designed for excellent fitting of Alumil profiles
- Each punching machine refers to one Alumil System or a small group of similar Systems in terms of millings
- Manual or pneumatic versions for the majority of the machines
- “Express” version to cover the most common millings
- Punching machines are mainly “MTO” (Make to Order) codes
- Each punching machine is delivered with its manual containing the tools it contains and the profiles each tool mills

MATERIALS

- High quality materials

SURFACE COATING

- No additional surface coating

CERTIFICATION

- Alumil 12 month Guarantee

ROTARY PNEUMATIC PUNCHING MACHINE WITH CHANGEABLE TOOLS

FUNCTION

Rotary pneumatic press for Alumil systems with 8 available slots for changeable tools positioning.

TECHNICAL FEATURES

- Designed for cold-pressing Alumil aluminium profiles.
- Requires only air supply for ease of use with 6-8 bar pressure.
- Contains:
 - 2 different levels
 - 8 available slots for changeable tools (4 per level)
- Compatible with all new tools (e.g. M35) with available library.
- Quick-Fit feature that allows the tool to be placed or removed in less than 3".
- 4 threaded holes available on the base which allow anchoring.
- The year of construction is stated on the plate (with CE marking) affixed to the machine.
- The serial number is printed directly on the plate.
- Ability to rotate 360° for ease of use.
- New tools will be produced according to new system launching.
- Quality control is performed per product and recorded in video based on each serial number.
- Thanks to the placement of one phase per side, there is enough free space for the profile positioning.
- New tool production can be available upon your request.
- Separation between applicable phases:
 - phases only for the lower floor.
 - phases for both floors.

Description	Unit of measurement	Value
Cylinder Stroke	mm	30
Working Pressure	Bar	6-8
Dimensions	mm	300x300x565
Weight	Kg	145

Pneumatic punching machine

1: Lightly press the top of the tool and position the tool on the press plate.

2: Push the tool over the slider until it locks. This positions the tool in the working position.

Tool height correction: screwing - unscrewing the screws, decreases or increases the tool height. One full turn of the screw is 1 mm.

MATERIALS

- High quality materials

SURFACE COATING

- No additional surface treatment

CERTIFICATION

- Extended Alumil 3 Year Guarantee
(The usual guarantee for punching machines is 12 months)

EXTREME GLAZED SYSTEMS – FIRE / BULLET / EXPLOSION RESISTANT SYSTEMS

FUNCTION

Steel and stainless steel fire / bullet / explosion resistant glazed profile systems. Available both insulated or non-insulated in a variety of different typologies, hinged windows, sliding doors and fixed elements.

TECHNICAL FEATURES

- 6 basic systems offering numerous capabilities in fire, bullet and explosion resistance in combination with burglary resistance and sound reduction. Systems are able to accommodate the following needs:
 - Fire resistance
 - Fire resistance in combination with Bullet resistance
 - Bullet resistance
 - Explosion resistance
 - Burglar resistance and sound reduction are always covered in all above scenarios
- Every product is labeled with identification plate which includes door system identification data, in accordance with current regulations
- Standard accessories for each typology are included
- Smoke tightness test for Sa and S200 according to EN 1634 for fire resistant systems
- Dimensions, typologies, glass and accessories are always according to the relevant classification report, no intervention is permitted.
- Possibility for sliding doors up to fire class EI30
- Possibility of certifications according to UL, BS and Russian standards
- Individual Folder accompanies each product including its certification, conformity of performance and installation manual

EXTREME GLAZED SYSTEMS – FIRE / BULLET / EXPLOSION RESISTANT SYSTEMS

Various typologies of fire rated profiles

Fire testing and approvals

MATERIALS

- Extruded steel and stainless steel (AISI 316L) profiles
- Isolation Promatec stone hard material
- Glass from 6 to 60 mm
- Materials of accessories according to classification reports

SURFACE COATING

- Profiles and hinges in every RAL color or INOX
- Silver door closer
- Inox handle
- Panic bar in black plastic, silver aluminum or INOX

CERTIFICATION

- Fire resistance according to EN 1634
- Smoke tightness according to EN 1634
- Burglary resistance according to SS/EN 1627
- Bullet resistance according to SS/EN 1522, EN 1523
- Explosion resistance according to EN 13123-2
- Sound reduction according to EN 140-3

FIRE-RATED METAL DOORS (part 1)

FUNCTION

Fire-Rated metal doors certified according to UNI9723 and EN1634-1 for fire resistance 60, 90 and 120 minutes

TECHNICAL FEATURES

- Fire resistant materials of the highest standards
- 50 or 60mm door thickness depending on fire rating
- Standard dimensions for single leaf width from 800 to 1350mm and 2050 or 2150mm height
- Standard dimensions for double leaf width from 1200 to 2000mm and 2050 or 2150mm height
- Every product is labeled with identification plate which includes door system identification data, in accordance with current regulations
- Reversible for right and left opening
- Installation on masonry with metal anchors
- 4-sided metal frame of "Z" type (53x55 or 65mm) with thermal-expansive sealing tape and removable threshold
- Heavy duty hinges 160Kg, one for adjustment and one with closing spring
- Option for window with fire-rated glass 23/54mm, round or rectangular
- Double leaf with closing regulator and automatic locking latch
- Fire-resistant handle of «U» type, inox or plastic with metal core
- Heavy duty fire-rated doors with capability of installation at all types of masonry, i.e. brick, plasterboard, «tunnel» upon request
- Special dimensions up to 2540mm width and 2670mm height on demand
- Additional equipment upon request (panic bar, inox handle, ventilation louvers, automation and controlled access)

MATERIALS

- Sendzimir galvanized sheet metal
- Inox or polyamide handle
- Inox or aluminum panic bar

SURFACE COATING

- Standard RAL 7035 Grey
- Availability in various RAL upon request
- Every RAL with "orange skin" and anti-scratch finishing
- Availability in NDD digital decor

CERTIFICATION

- Fire resistance according to EN 1634-1 and UNI 9723

MULTI-PURPOSE DOORS

FUNCTION

Metal multi-purpose doors with special durability and wide range of applications

TECHNICAL FEATURES

- Reversible for right or left opening
- 40mm door thickness
- Standard dimensions for single leaf width from 700 to 1350mm and 2050 or 2150mm height
- Standard dimensions for double leaf width from 1200 to 2000mm and 2050 or 2150mm height
- Perimeter metal frame 48x40mm with removable sill and feature extensions
- 4-sided metal frame 48x40mm with removable threshold
- Installation at all types of masonry
- Option for double-leaf and manual locking latch
- Without fire-resistance
- Ventilation louver made of either black or white PVC. The opening direction of the door needs to be specified

MATERIALS

- Galvanized steel
- Honeycomb core

SURFACE COATING

- Standard RAL 7035 Grey
- Availability in various RAL upon request
- Every RAL with "orange skin" and anti-scratch finishing
- Availability in NDD digital decor

CERTIFICATION

- Alumil 5 Year Guarantee

With blades

ACCESSORIES - ALUMIL 5 YEAR GUARANTEE

Alumil's 5-year guarantee covers products within Alumil's Range of Accessories.

Alumil will replace accessories that have significantly failed technically or aesthetically. The guarantee is valid only if suitable installation, maintenance and use have been carried out properly. The guarantee shall not be extended to any other part (within the window or not) that has been affected by the failure of the accessory; Alumil's guarantee is valid only regarding the replacement of the specific part. Shipping, installation, dismantling or any other labour costs are not covered. In order to validate the guarantee, proper installation and maintenance has to be confirmed by a qualified Alumil engineer.

Certain accessories may have also further extended guarantees (up to 10 years). Accessories with electrical components are guaranteed separately for 2 years, while punching machines' guarantee is valid for 12 months. Please always refer to the specific certification data sheets of the individual items.

Special color project-oriented accessories have the same operation and surface coating guarantee as the same product in range colors only if provided by Alumil SA.

Mill finish accessories (handles, hinges, etc.) are available in some Alumil range products in case of a special color project continuation. The operational guarantee of an Alumil accessory which is surface treated by a third party remains valid only if the coating does not require assembly or/and disassembly of the accessory. The surface coating guarantee for special colors (not included in the CDS catalogue) is valid only for Alumil SA invoiced surface treated accessories.

For more information, please contact Alumil S.A.

D	very high	no
E	moderate	from -25° to +70 °C
F	high	from -25° to +70 °C
G	very high	from -25° to +70 °C

EN STANDARDS' GRADE CLASSIFICATIONS

EN 1154

Weight capacity shall be classified according to the following grading system:

Door closer power size	Recommended door leaf width	Test door mass	Closing moment		
			Between 0 and 4° Nm / Nm min. / max.	Between 88° and 92° Nm min.	Any other angle of opening Nm min.
1	750	20	9 / 13	3	2
2	850	40	13 / 18	4	3
3	950	60	18 / 26	6	4
4	1100	80	26 / 37	9	6
5	1250	100	37 / 54	12	8
6	1400	120	54 / 87	18	11
7	1600	160	87 / 140	29	18

EN1125:2008

Durability shall be classified according to the following grading system:

Grade	Cycles
6	100.000
7	200.000

Door mass and closing force shall be classified according to the following grading system:

Grade	Door mass	Closing force
5	up to 100 kg door mass	50 N maximum closing force
6	up to 200 kg door mass	50 N maximum closing force
7	above 200 kg door mass as specified by the manufacturer	50 N maximum closing force

Suitability for use on fire/smoke doors shall be classified according to the following grading system:

Grade	Suitability
0	not approved for use on fire/smoke door assemblies
A	suitable for use on smoke door assemblies
B	suitable for use on smoke and fire door assemblies

Security shall be classified according to the following grading system:

Grade	Force
2	1000N - force on the leaf in opening direction
